MUD MINNOW PADDLE TAIL < BSWMM >

New for 2010 Bomber Saltwater Grade® went after one of the most versatile and widely used soft plastics on the market, the paddle tail. Bomber Saltwater Grade® designed the MUD MINNOW PADDLE TAIL to have a hydrodynamic baitfish shape that not only looks natural, but also swims with increased vibration and action to trigger that predatory response. Once you get their attention, the MUD MINNOW PADDLE TAIL is super-charged with FUSE™ scent and taste technology making it as close to the real thing as you can get. The MUD MINNOW PADDLE TAIL is designed using saltwater grade plastic, is available in 4- and 6-inch versions and 12 hot colors for every situation.
