MUD MINNOW CURLTAIL < BSWMMCT >

Curltails have always been one of the most widely used styles of soft plastics in saltwater. For 2010, Bomber Saltwater Grade® took it to the next level. The new MUD MINNOW CURLTAIL is designed to have a hydrodynamic baitfish shape that not only looks natural, but also swims with increased vibration and action to trigger that predatory response. The MUD MINNOW CURLTAIL is the perfect shape for a wide variety of gamefish and is super-charged with FUSE™ scent and taste technology. Put all this together and the MUD MINNOW CURLTAIL is as close to the real thing as you can get.
