DIRECTORY OF PRIMARY CARE PHYSICIANS

**BlueCross BlueShield
of Alabama**

Joint member, American Medical Association and American Nurses Association

ALABAMA PERSONAL CHOICE DIRECTORY

This directory contains a listing of the physicians participating in Blue Cross and Blue Shield of Alabama's Primary Care Physician network, Alabama Personal Choice. To maximize the benefits of Alabama Personal Choice, you must select and use a participating Primary Care Physician for all your medical needs. This directory represents our most current statewide listing as of July 25, 2006. However, the list does change from time to time. You can verify the status of a physician by checking with his or her office. You may also visit our web site at www.bcbsal.com for the most current listing.

Selecting Your Primary Care Physician

The Primary Care Network includes physicians who specialize in treating your overall health care needs. Primary care specialties in the network include Family Practice, General Practice, Internal Medicine, Geriatrics and Pediatrics. In order to receive in-network benefits, you must choose a Primary Care Physician (PCP) from this directory to coordinate the health needs for you and your family. If you are not a current patient of the physician you choose, check with the physician first to see if his/her practice can accept new patients.

Each family member can select a different physician. Be sure to list the selection of a Primary Care Physician for each family member in the space on your enrollment form. *Make sure that you list the physician's UPIN (Unique Provider Identification Number) in the space provided on the form.*

Referrals to Specialists

While your Primary Care Physician will provide total health care management for you and your family, you may be referred to a network specialist when your medical needs require specialty care. Keep in mind that you should first contact your PCP for treatment. If he or she cannot treat your condition, you will be referred to a specialist for treatment. The specialist must also be a network specialist in order for you to receive maximum benefits. In addition, if a specialist wants to refer you to another physician, remind him or her to notify your Primary Care Physician so that you will continue to receive maximum benefits.

OB/GYN Care

It is important that female members select a Primary Care Physician from a primary care specialty to provide general health care needs. However, due to the special female health care needs provided by OB/GYNs, some self-referred visits are allowed, and OB/GYN visits are covered when referred by your Primary Care Physician. Please check your benefits summary for specific information about this important coverage.

In either case, coverage is available only when provided by OB/GYN network providers. A listing of OB/GYNs who participate in the network follows the listing of Primary Care Physicians in this directory.

Using This Directory

In this directory, Primary Care Physicians are listed by county then city then specialty. Under each physician's name you will find the following information:

- > UPIN (It is important that you include this number in addition to the physician's name on your enrollment form)
- > Office address of the physician's primary office location
- > Phone number (for making appointments)
- > Office hours
- > Hospitals in which the physician has admitting privileges

Following the listing of Primary Care Physicians is a listing of participating network OB/GYN physicians.

The final section is an alphabetical index that references the page(s) on which each physician's name appears in this directory.
