

Universal Bow Holder - PN 85091

Summit's new Universal Bow Holder is designed to mount to the 1" square arm rest tubing on your top or platform. This is a clamp on holder - no drilling required.

Step 1. Remove the 10-24 allen head bolts and the backing plate from the bow holder assembly.

Step 2. Place the holder on the 1" tubing. Place the backing plate and both bolts back onto the holder as shown in **Figure 1**.

Step 3. Tighten the both bolts with an allen wrench.

Step 4. Remove the large "T" knob and apply a small amount of gun oil on the threaded stud. Reinstall the "T" knob.

Step 5. Position the fork by loosening the "T" knob and rotating it. Once it is in the correct position, **tighten the knob securely** so that the fork will not spin.
