Notes to Designers:

- All graphic files must be built at 150 dpi at the overall graphic layout size.
- All graphic files must be created using CMYK mode to ensure the best color matching. If you would like a specific color matched, you MUST provide a PMS color or we cannot guarantee color matching.
- It is best to flatten all images and outline all text to ensure that nothing will drop out or change during file transfer.
- Be aware of Safe Viewable Zone and Guides that may cut your graphic off. Using guidelines will keep margins on your radar and prevent mistakes.
- The "Wrapped Zone" is visible, but keep in mind that this portion is wrapping around the sides of the hardware.
