## >> THE ONLY THING BETTER THAN A LIFE SPENT IN THE WOODS IS SOME TIME SPENT IN R&D BEFOREHAND.

ANYONE WHO STEPS FROM THE TRODDEN PATHS OF CIVILIZATION INTO THE GREAT WILD IS A LUCKY INDIVIDUAL. WHEN YOU DO SO TO ENACT YOUR RIGHTFUL PLACE IN THE FOOD CHAIN, SO MUCH THE BETTER. BUT THIS STEP REQUIRES PREPARATION. EXPERTISE AND KNOWLEDGE, AS WELL. FORTUNATELY THIS IS WHAT YOU GET WHEN A PASSIONATE HUNTER, WHO ALSO HAPPENS TO BE A TRAINED ENGINEER, SETS OUT TO MAKE TREESTANDS. THIS IS WHAT YOU GET EVER SINCE JOHN WOLLER SR. STARTED SUMMIT TREESTANDS IN 1981.

THE COMBINATION OF HUNTING PASSION AND ENGINEERING EXPERTISE GOES A LONG WAY IN EXPLAINING WHY SUMMIT HAS LEAD THE WAY IN DEVELOPING STANDS THAT ARE SECURE, COMFORTABLE, SILENT AND CONCEALED. PROOF IS EVIDENT IN OVER A DOZEN SUMMIT PATENTS, NOT TO MENTION COUNTLESS INNOVATIONS YOU NOW FIND THROUGHOUT THE INDUSTRY — PADDED SEATS, BARS AND GUN RESTS, NOISELESS PLASTIC BUSHINGS, KNOBS INSTEAD OF WING-NUTS, WELDED BACK BAR BOLTS — THE LIST GOES ON. IT'S THE SAME COMBINATION THAT KEEPS SO MUCH OF THE MANUFACTURING OF SUMMIT TREESTANDS IN DECATUR, ALABAMA WHILE OTHERS MOVE THEIR OUTFITS OFFSHORE. AND IT'S WHY SUMMIT STANDS ARE BACKED BY THE BEST WARRANTY IN THE BUSINESS. IT'S WHAT MAKES A SUMMIT — WELL, A SUMMIT.

### A MESSAGE FROM JOHN WOLLER SR.

When I first started making climbing stands in my garage over thirty years ago, I never dreamed Summit would grow to become the industry leader in treestand design and engineering. Safety, Comfort, Silence and Concealed — they've been the guiding principles of product development at Summit since I founded the company in 1981, and we've worked hard to apply them to all of our new products for 2010.

I'm particularly excited about our new Switchblade and Dagger climbing stands — an all-new collapsible stands designed for easy storage transportation in the back of a truck or SUV.

Our line of ground blinds, which we introduced last year, is also growing in 2010. First, we've developed an extra-large Run-N-Gun Mega Blind that sets up and takes down in a matter of seconds, not minutes. Then, for you varmint hunters, we're introducing our innovative new Predator blind — a lightweight, compact, open-faced shell designed to maximize concealment while providing a wide-angle view.

So, here's to some good hunting in 2010. Just please remember to wear your safety harness so you'll be hunting again the next season, too. — John Woller Sr., Founder

2010

>>>>>> CLIMBING STANDS

# >> SOME PEOPLE SEEM MORE COMFORTABLE IN THE WOODS THAN OTHERS.

THERE ARE A VARIETY OF REASONS FOR THIS.

THERE IS NO SUBSTITUTE FOR SKILLS, KNOWLEDGE AND EXPERIENCE. NOTHING THAT COMPARES TO A GRANDFATHER SHOWING YOU THE WAY OF THE WOODS. BUT BY THE SAME TOKEN, THERE'S NO DISCOUNTING THE FACT THAT MOST OF THE HUNTERS WHO SEEM AT EASE IN THE FOREST DO SO FROM A SUMMIT CLIMBING STAND. EVERY SUMMIT CLIMBING STAND OFFERS A PEACE-OF-MIND THAT CAN ONLY COME FROM THE FINEST, MOST COMFORTABLE STAND AVAILABLE. STANDS THAT ARE THE BENEFICIARIES OF A TWENTY-NINE YEAR TRADITION OF INNOVATION AND MANUFACTURING REFINEMENTS. BASICALLY THE STAND CHOSEN BY THOSE WHO KNOW WHAT THEY'RE DOING.

IN 2010, WE INTRODUCE TWO STANDS DESIGNED TO FOLD FLAT FOR CONVENIENT TRANSPORT AND STORAGE.

The new Dagger™ is an open-front climbing stand, with the compact convenience of folding flat during storage or when you're on the move.

# CLIMBING STANDS

STAND YOUR GROUND

## SUMMIT TITAN

MODEL  
81087

The Titan is our largest climbing treestand with more room than any we've ever built before. With a wider climbing width and length and way more platform space, the Titan will accommodate the biggest hunter — or anyone who wants some extra room. The comfortable padded seat easily adjusts up and down for bow and gun hunting, and the multi-purpose solid front bar not only makes climbing easier, but serves as a gun rest.

Weight limit: 350 lbs. Overall weight: 25 lbs.

QUICKDRAW™

RAPIDCLIMB™  
STRUPS

summi|okt

## SUMMIT GOLIATH

MODEL  
81067

The Goliath is a full-featured climber for full-framed hunters. Extra room and an ample 350 lb. limit makes it the perfect stand for the bigger hunter or for anyone looking for a little extra room. A solid front bar makes climbing easy and works well as a gun rest, and thick padding on the armrests and seat make sure you stay comfortable all day.

Weight limit: 350 lbs. Overall weight: 21 lbs.

**NEW**  
FOR 2010

## SWITCHBLADE™

MODEL  
81098

Our engineers made a good thing even better when they designed a collapsible version of our best-selling Viper climbing stand. The new Switchblade™ folds flat for easy storage or transportation in the back of a truck or SUV. Lightweight, quiet, roomy and comfortable, the Switchblade features a padded seat that can be raised or lowered when hunting with bow or gun. Its solid front bar makes climbing easy while doubling as a gun rest.

Weight limit: 300 lbs. Overall weight: 23 lbs.

QUICKDRAW™

RAPIDCLIMB™  
STIRRUPS

summitlokt™

## VIPER™

MODEL  
81066

Our lightest sit-and-climb stand, the Viper™ is our best all-round climber, with a perfect balance of roominess, comfort, features and light weight. The versatile padded seat can be raised for bow hunting and lowered for hunting with a gun — and the solid front bar makes climbing easy and works well as a gun rest. Like all Summit climbers, Viper™ features our RapidClimb™ Stirrups, QuickDraw™ and SummitLok™ technologies.

Weight limit: 300 lbs. Overall weight: 20 lbs.

## ULTIMATE VIPER™

MODEL  
81072

A completely accessorized Viper™ featuring our incredibly comfortable Surround Seat (also available as an accessory to upgrade your current Summit stand) and a super-thick padded Comfort Mat which takes the back pain out of prolonged standing. With a fully adjustable gun rest, armrest padding throughout and a total camouflage package — including a free drop blind (not shown) — you'll be hunting in comfort and stealth.

Weight limit: 300 lbs. Overall weight: 26 lbs. with accessories.

## 180° MAX

MODEL  
81094

The 180° Max offers a bit more room and capacity for bigger hunters and those who just prefer some extra space. The height-adjustable Surround Seat lets you sit facing the tree or can be reversed with the seat against the tree. The premium-quality precision-welded aluminum extended-top frame is ideal for tall hunters, yet keeps the weight down to a manageable 23 lbs.

Weight limit: 350 lbs. Overall weight: 23 lbs.

**NEW**  
FOR 2010

## DAGGER™

MODEL  
81097

With all of the performance features and creature comforts of our popular Razor, the new Dagger™ open-front climbing stand folds flat for compact convenience during storage, or when you're on the move. The comfortable padded seat is fully adjustable and the spacious platform provides plenty of room for long haul hunting.

Weight limit: up to 300 lbs. Overall weight: 21 lbs.

# OPEN FRONT CLIMBING STANDS

STAND YOUR GROUND

## RAZOR™

MODEL 81068

The Razor™ provides all of the clearance of an open front stand with the climbing ease of a sit-and-stand climber. The unique folding bar allows you to sit and climb to your preferred hunting elevation — and then fold it out of the way while you hunt. The comfortable padded seat is easily removed or adjusted for height — and the spacious platform is the same size as the Viper™ and Goliath™.

Weight limit: up to 300 lbs. Overall weight: 21 lbs.

QUICKDRAW™

RAPIDCLIMB™

## OPENSHOT™

MODEL 81079

Designed for hunters who like to pack it back into the deepest woods, the OpenShot™ weighs a scant 15 pounds. And, for a compact, ultra-portable stand, it feels plenty comfortable and roomy when you settle down to hunt. A unique folding seat is set inside the seat frame and easily folds up when you want to stand up against the tree. The padded seat then becomes a cushion for your back, allowing you to stand more comfortably for longer periods of time and with plenty of room.

Weight limit: up to 300 lbs. Overall weight: 15 lbs.

TREESTANDS

# >> DEER ROAM THE WOODS IN SEARCH OF FOOD. SEE THE CONNECTION?

YOU HAVE TWO OPTIONS. YOU CAN SCOUT A SPOT, SET UP A BLIND AND WAIT FOR THE DEER TO COME TO YOU, OR YOU CAN SCOUT SEVERAL SPOTS AND MOVE TO THE DEER. IF YOU CHOOSE THE LATTER, YOU WILL CERTAINLY BE INTERESTED IN SPENDING CONSIDERABLE TIME CHECKING OUT THE FULL SELECTION OF SUMMIT HANG-ON STANDS. BUILT ON THE FOUNDATION OF SUMMIT RELIABILITY, THEY ARE EASY TO USE, COMFORTABLE, SECURE AND INCREDIBLY MOBILE. THINGS THAT ALL SEEM TO GO WELL ON THE MOVE AND IN THE WOODS.

### THE ULTIMATE HANG-ON STAND SEATING SYSTEM.

The Raptor Series Eagle model features a 3" saddle-style padded seat that is designed to relieve pressure points for significantly more comfort during the long hunting hours. You can also quickly change the height of the seat for improved circulation — or just to change positions. And the seat flips up flush against the tree trunk, making it easy to stand with your back to the tree.

### RAPTOR SERIES WITH TALON BRACKET SYSTEM

### DESIGNED BY ENGINEERS. AND HUNTERS.

If you think all hang-on treestands look and function pretty much alike, you haven't seen the Raptor-Series featuring Summit's innovative Talon Quick-Attach Bracket System. Once you strap the compact bracket to a tree, you can install or remove the stand in less than 30-seconds. Easy, quiet and foolproof — especially in the dark, the Talon System allows you to remove your stand from the tree every night to prevent theft or to comply with hunting regulations — without the hassle of re-hanging the bracket every morning.

(Additional Talon brackets are available separately.)

STAND YOUR GROUND

## NEW FOR 2010: WATERPROOF, FOAM RSX SEAT.

The new RSX seat for our Raptor Series Hang On Stands is made from closed-cell foam using cross link technology.

To us regular folks, this means that it is a waterproof, extra-thick foam cushion that is soft enough to sit on for hours.

## SINGLE CABLE SPREADER DESIGN.

All of the Raptor Series hang-on stands feature our Single Cable Spreader design. Meaning the platform is supported by a single, self-leveling cable with a unique spreader bar below the seat. A seemingly simple feature that significantly increases the useable space on the platform by eliminating the constricting "V" formed by traditional 2-cable suspension systems.

The leveling cable system makes it incredibly easy to make precise adjustments to the platform, too.

**summitlokt**

EVERY JOINT IS LOCKED INTO PLACE BEFORE WELDING, AND DESIGNED TO MINIMIZE STRESS ON EACH WELD.

## RSXHAWK

MODEL  
82053

Light, compact and comfortable, the rsxHawk will hang in less than 30 seconds using Summit's innovative, Talon Bracket System. Built of precision-welded aluminum using ultra-quiet SummitLokt<sup>™</sup> construction, the Hawk features Summit's Single Cable Spreader that eliminates the space-restricting "V" formed by 2-cable suspension systems. It's simply the most sophisticated hang-on stand ever designed and built.

Both rsxHawk and rsxOsprey stands feature an extra-thick, waterproof, close-cell foam padded seat that quickly flips up and out of the way to make it easy to stand with your back to the tree.

All Raptor Series Hang-On Stands are engineered, designed and built in Decatur, Alabama and backed by Summit's 5-Year Limited Warranty.

**summitlokt**

## RSxEAGLE

MODEL  
82054

The world's most comfortable hang-on stand features Summit's new adjustable saddle-style seat which has 3" of padding and is suspended to relieve pressure points for incredible comfort during the longest hunts. The seat also flips up and adjusts for height. The rsxEAGLE also hangs easily using our Talon Bracket System — and our Single Cable Spreader maximizes space on the rsxEAGLE's extra-large platform. It's simply the ultimate in comfort and convenience.

The innovative Single Cable Spreader bar increases the usable space of your platform by eliminating the constricting "V" of two-cable systems. With plenty of room, you can stand with your back to the tree — not sideways — and move around without fear of tripping.

Summit's ultra-comfortable saddle-style seat also flips up to become a padded back pad for stand-up hunting. The built-in "quick clip" secures the seat to the back pad.

## STEEL HANG-ON STANDS

STAND YOUR GROUND

Featuring rugged steel construction, the rsxOSPREY offers most of the advantages of the Raptor series aluminum hang-on stands at a lower retail price. The padded, flip-up seat and unique Single Cable Spreader makes standing with your back to the tree safe, comfortable and convenient. And, the exclusive Talon Bracket System makes hanging and removal a snap.

The steel version also uses a Talon bracket for fast, safe and reliable hanging and removal of the stand.

Summit's leveling platform is safe and secure. Height and attitude adjustments can be made quickly by moving one or both locking clips up or down a notch. Then, the single cable slides through the spreader bar to automatically level the platform.

**summit**okt

EVERY JOINT IS LOCKED INTO PLACE BEFORE WELDING, AND DESIGNED TO MINIMIZE STRESS ON EACH WELD.

>>>>>> LADDER STANDS

>> YOU DON'T HAVE TO KNOW  
A THING ABOUT OPERA TO KNOW  
BALCONY SEATS ARE ALWAYS THE WAY TO GO.

YES, INDEED, THIS IS THE KIND OF STEPPING UP IN THE WORLD THAT RESONATES WITH TRUE HIGH-CLASS FOLKS. TOWERING ABOVE THE FOREST FLOOR ON THE VERGE OF AN EPIC MOMENT. AN ARIA OF FLORA AND FAUNA CONDUCTED IN THE GREATEST SYMPHONY HALL ON GOD'S GREEN EARTH. AND YOU HAVE THE BEST SEAT IN THE HOUSE — A SUMMIT LADDER STAND. AVAILABLE IN ONE, ONE-AND-A-HALF AND TWO PERSON MODELS, THERE IS NO MORE SOLID, OVER-BUILT LADDER STAND AVAILABLE ANYWHERE. PERIOD.

### NO OTHER LADDER STAND COMES CLOSE.

Did you ever think about the “wobble factor” when shopping for ladder stands? It seems like the lower the price, the higher the wobble factor — which you only discover after you’ve lugged your new stand home from the store, hauled it out into the woods and mounted it to a tree. Nice.

In addition to low price, another due that should raise an eyebrow, is the “stabilizer bar.” You can pretty much figure that any stand that needs a stabilizer bar isn’t going to be very stable. Especially on cold, dark mornings before the coffee kicks in.

Enter the Summit ladder stands. They don’t need stabilizer bars because our ladders are built with extra-heavy-duty thick-gauged welded steel, with wide rungs and sturdy rails. The result is a rock-solid hunting platform that won’t wobble when you’re dimbing up or down — or when the wind picks up. When you’re hunting out of a Summit ladder stand, the only wobble you’ll ever feel will be in your knees when that 10-point toad you scouted all summer suddenly saunters into view.

# LADDER STANDS

STAND YOUR GROUND

## SINGLE SHOT

MODEL  
82046

The most stable, most durable ladder stand on the market today. Over-built with extra-heavy-duty thick-gauge steel, with wide, welded rungs and sturdy hand rails, the Single Shot is so solid that it does not need a stabilizer bar to prevent ladder and platform wobble. With extra-thick, camouflage padded seats and a spacious platform, you won't find a more rock-solid, safer ladder stand anywhere.

Thick, padded seat and armrests are designed to be ultra-comfortable for extended periods of time. All of our ladder stands are offered in Realtree™ AP camouflage.

## SINGLE SHOT MAGNUM

MODEL  
82047

With all the quality features of the Single Shot, the Single Shot Magnum offers 50% more room for larger framed hunters — or those who just want some extra room to move around. Same thick-gauge welded steel construction. Same wide, welded rungs and sturdy rails. Same ultra-stable, ultra-safe design. But, with a wider camouflage padded seat and platform.

The one-and-a-half person model is a great concept for those who like a little extra room to move around and shift positions. The thick, padded seat and armrests make this a one-man seating suite.

## DOUBLE BARREL

MODEL  
82049

When hunting with a friend or loved one, you sure don't want to take chances in a flimsy, bargain-priced stand from who-knows-where. The Summit Double Barrel is built from the same quality materials and to the same standards as every Summit ladder stand — but in a two-person seating version. Safe. Secure. Comfortable. For two.

Super-wide, bench-style seating with thick 2" padding is designed to comfortably support two hunters for extended periods of time.

ALL OF OUR LADDER STANDS ARE OFFERED IN REALTREE AP CAMOUFLAGE.

>>>> LADDER STANDS

# CLIMBING STEPS

STAND YOUR GROUND

## BUCKSTEPS™ MODEL 82008

More than likely, you've heard somebody talking about BuckSteps.™ Since their introduction, they've become a hunting staple in the woods. Big enough to get both boots on while hanging your stand, but small enough not to be noticed, BuckSteps set you up to choose the best location, not the easiest.

BuckSteps provide safe, slip-proof footing, even when wearing muddy or snow-caked boots. They're designed to compactly nest together for easy packing in and out of the woods.

Patent pending

## SWIFTTREE™ MODEL 82050 82051 NEW FOR 2010

Significantly improved and upgraded for 2010, our popular SwiftTree™ ladders retain all the features that made them best-sellers, plus a few more. The unique enclosed steps that provide sure footing and help prevent your boot from slipping off the side are now over-sized for easier entry and to accommodate larger, insulated boots in cold weather. Then, we welded two steps, side-by-side, at the top of each section for a more stable platform when aligning and hanging the next section.

**TWO MODELS:**  
SwiftTree Model 82050: 17'  
SwiftTree 2 Model 82051: 22'

The unique enclosed steps "capture" your foot to eliminate the possibility of your boot slipping off the end of the step — providing safe, secure footing for even muddy or snow-caked boots.

**NEW**  
FOR 2010

## HUNTER SEAT

MODEL  
82062

Our new Hunter Seat is a lightweight, portable seat designed for spot-and-stalk hunts, quick set-ups for turkey, or just taking a break from scouting. Built from powder-coated steel with a padded camouflage seat, it's designed to lean up against a tree where it's stabilized by a sturdy "Y" brace—and then anchored in the ground with a three-pronged point. The Hunter Seat then allows you to sit in a normal position (not crouched) with your back comfortably against the tree. Weighs 4 lbs. for easy carrying and includes a supplied shoulder strap.

>>>> CLIMBING STEPS

## TROPHY CHAIR

STAND YOUR GROUND

MODEL  
82023

This simple seat will open up a whole new way to hunt deer, turkeys, and lots of other stuff, too. The possibilities are unlimited. Just sling the buckle around the tree and hang it. With the ultra-comfortable seating configuration with padded arm rests, there will be no more squirming around on pickle buckets, stumps or rocks. Also great for ducks in flooded timber. Hunt in total comfort.

>>>>> TROPHY CHAIR

### GUN & BOW ACCESSORIES

#### **ADJUSTABLE GUN REST** | 85115

Fully adjustable gun rest fits most of our aluminum climbing tree-stands. It includes a camo padded front bar.

#### **ADJUSTABLE GUN REST FOR GOLIATH, TITAN or 180 MAX** | 85129

Fully adjustable gun rest fits Goliath, Titan and 180° Max only. It includes a padded front bar.

#### **RAPTOR SERIES HANG ON GUN REST** | 85156

Pivoting gun rest for use on Raptor Series hang on stands. It includes a camo padded front bar.

#### **UNIVERSAL BOW HOLDER** | 85091

Our all metal, universal bow holder is the perfect stand addition for bowhunters. It clamps on in seconds and fits most Summit models plus many commercially available stands.

### PLATFORM ACCESSORIES

#### **FOOTREST KIT FOR ALUMINUM NON FOLDING TREE STANDS** | 85023

Platform channels run side to side, not front to back. Eliminates pressure on back of your legs. Also fits 2004 and newer Backpacker model stands. Does not fit steel Classic. Easy to install.

#### **HIGH TRACTION STRIPS** | 85002

Set of 5 (five) adhesive backed, non-skid strips. Very easy to apply and will fit all of the Summit models.

#### **RAPID CLIMB STIRRUPS** | 85052

Eliminate your toe straps. Just rest your heel on the bungee, stretch it back and insert your foot in the stirrup. Stirrups will fit any of our aluminum stands with 1" square tubing. They also fit many commercially available stands.

### BACKPACK STRAPS

#### **DELUXE BACKPACK STRAPS** | 85162

Upgrade to these thick padded straps. Adjustable and easy to install. Fits many other commercially available stands.

#### **ADJUSTABLE BACKPACK STRAPS** | 85005

A set of camo backpack straps for use with any of our Summit stands. Quick-adjust buckle. Fits many other commercially available stands.

### DELUXE CUSTOMIZATION

#### **COMFORT MAT** | 85155

Made with comfortable high-density foam that won't hold water. Reduces the stress on your feet and back.

#### **DROP BLIND** | 85152

Easy to deploy and then rolls up to stow around the top bar of many of our closed-front stands.

## PADS AND BAGS

**72" PAD KIT** | 85121  
Single 72" pad with cable ties for most Summit stands. Also fits many commercially available stands.

**FRONT STORAGE BAG** | 85122  
Zippered storage bag for our hunting stands. Our front storage bag will fit any Summit that has a front bar, and they also fit many other brands of treestands.

**SIDE STORAGE BAGS** | 85123  
Two zippered storage bags for your hunting stands. Bags are tapered to fit neatly under the armrests on all Summit stands. They also fit many other brands of treestands on the market.

## SEATING ACCESSORIES

**FOAM SEAT FOR CLIMBING TREESTANDS** | 85147  
Fits most model Summit climbing treestands including: Viper, Goliath, Razor, Titan, Switchblade, Dagger, Bullet and Python. Also fits many commercially available stands.

**SURROUND SEAT** | 85148  
Offers full coverage enclosed seat and convenient pockets within easy reach. Fits most Summit climbing treestand models.

**RAPTOR SERIES RSX SEAT** | 85149  
Raptor Series replacement seat for Hawk, Osprey and Falcon Hang On stands. Features Cross Link Technology (RSX)

**FOAM SEAT FOR OPENSOT** | 85189  
Fits all OpenShot treestands made between 2008 to current.

## UTILITY ACCESSORIES

**UTILITY STRAPS WITH TOURNIQUET BUCKLE** | 85024  
Our multi-purpose utility strap will come in handy in many situations. This is the same strap that is included with all our treestands. Sold in pairs.

**30' BOW ROPE** | 85030  
Works great for hoisting your gun or bow. Easy to attach, tangle-free design.

**REPLACEMENT SHRINK TUBE FOR CABLES** | 85010  
Two full-length shrink tubing pieces to replace old, worn-out tubing. Heat with heat gun to apply. Sold in pairs.

**REPLACEMENT CABLES FOR CLIMBING TREESTANDS** | 85009  
Instead of trying to repair nicks or cuts, purchase a brand new pair of cables for your climbing treestand. Sold in pairs. Fits all Summit climbing cable stands.

SEAT-O-THE-PANTS

# SAFETY HARNESSSES

We think the most important piece of hunting equipment you can take into the woods is a safety harness that's certified to meet the TMA standards for harnesses / treestands. That's why we've devoted as much of our engineering expertise to developing our Seat-O-The-Pants line of safety harnesses as we have to developing treestands. Once again, our design principles of Safety, Comfort, Silence and Concealment guided the development of these must-have safety products.

**SAFETY:** Seat-O-The-Pants harnesses are safe because their tangle-free design makes them easy to put on — even in the dark — so hunters are more likely to use them. With a four-point full-body design that's completely adjustable for a secure, comfortable fit, the leg straps are configured to prevent groin injury in the event of a fall. Each safety harness includes a lineman-style climbing rope and prussic hitch that helps to maintain continuous contact with the tree to protect you from falls as you climb.

**COMFORT:** All Summit treestand safety harnesses are lightweight, durable and won't interfere with your shooting. Convenient slides make it easy to adjust every strap for a perfect fit so they never bind or pull or otherwise feel uncomfortable or impede your movements.

**SILENT:** All metal components (d-rings, leg buckles) are rubber coated so they're 100% silent in the woods.

**CONCEALED:** Seat-O-The-Pants safety harnesses offer complete camouflage concealment.

"I never climb in a treestand without my Seat-O-The-Pants harness." David Blanton

## ROPE SYSTEM

Summit's Treestand Safety Rope Climbing System

is another innovative breakthrough in treestand

convenience and safety. The

strong, 30' braided nylon climbing rope features a pre-attached prussic hitch, which clips to your

safety harness tether. The prusik hitch can then be slid up the rope while you climb to your stand,

or slid back down as you descend — yet it will clinch tight in the event of a slip or a fall. This system

adds an important safety component to your hunt during those critical periods when you are

not seated or standing safely in your stand. The oversized rope, clip and carabineer are also easy

to use when wearing gloves.

## FASTBACK™

MODEL  
83064  
83065  
83066

The FastBack™ treestand safety harness has a lightweight, tangle-free design that will keep you cool and comfortable. It has all of the fall protection features you need but without added bulk or uncomfortable straps. You can move freely while wearing the FastBack, and the lightweight fabric back keeps you cool. Like all of our treestand harnesses, the FastBack can be worn over or under your standard hunting clothes, so you can put it on before you leave camp. Leg and waist buckle design allows for quick and positive hook-ups. Rubber-coated D-rings allow use as a lineman-style climbing belt. Finally, the tether strap includes “breakaways” designed to absorb the shock of a fall. Comes with a free safety rope and prusik knot.

## FASTBACK DELUXE

MODEL  
83071  
83072

The FastBack™ Deluxe has all of the safety and convenience features of our FastBack, including a lightweight, tangle-free design, “breakaway” tether strap. Deluxe features include a wider belt design, mesh back for hot weather comfort and two handy side pouches to carry hunting essentials like calls, scents and other small items. Like all Summit harnesses, the Fastback deluxe comes with a free safety rope and prusik knot.

>>> SAFETY HARNESSSES

SEAT-O-THE-PANTS

# SAFETY HARNESSSES

## FEATURES TO LOOK FOR IN A NEW SAFETY HARNESS

There's a lot of thought and engineering that goes into a good treestand safety harness, and the best subscribe to the time-proven KISS (keep it simple, stupid) principle. At Summit, we try to make everything as simple as possible — but never TOO simple. And that especially goes for our Seat-O-The-Pants Safety Harnesses.

**1. TANGLE-FREE DESIGN:** A safety harness doesn't do you any good if you aren't wearing it, which is why we pioneered tangle-free designs with our SOP harnesses so they'd be easy to put on and take off. Our standard SOP harness features a handy fanny pack to store your straps when you aren't wearing the harness. With our FastBack harnesses, all you have to do is pick them up by the tether, and the harness is ready to slip on just like a vest.

**2. LIGHTWEIGHT & COMFORTABLE:** Vest-style harnesses look easy to put on and take off, but that's often the best part about them. Many are heavy, hot, bulky and uncomfortable to wear — especially over a couple of layers of fleece and an outer shell. SOP harnesses are almost weightless, and once they're on, you almost forget they are there. SOP harnesses are also designed to be worn either over or underneath your hunting garments — a handy feature for cold-weather hunting when you want to rig up back in camp.

**3. SAFETY:** That's why you wear them, right? Our SOP harnesses quickly and easily adjust for a perfect fit so there's no binding or pinching, which is especially important if you fall. Plus, our tether straps feature sewn-in break-away pleats which pop open to lessen the shock of a serious fall, so you stay awake and alert.

## S.O.P.<sup>™</sup> HARNESS

MODEL  
83068  
83069  
83070

Simply the lightest, most comfortable, easy-to-use four-point safety harness on the market today. The original tangle-free design, the SOP features a convenient fanny pack to store all your straps when hiking in or out. Or, you can wear it under your hunting clothes so you can rig up before you leave camp. The webbing is lightweight, 6,000 lbs. strength polyester and the low-profile interlocking buckles are coated for absolute silence. A break-away tether cushions accidental falls. Comes with a free safety rope and prusik knot.

**S.O.P. LOCKING CLIP** | 83011

This rugged locking mountaineering-style carabiner is easy to operate while wearing gloves.

**S.O.P. SAFETY ROPE WITH HARDWARE** | 83015

A complete safety kit with climbing rope, prusik hitch, lineman's clip and locking carabiner clip.

**S.O.P. CLIMBING SYSTEM** | 83014

Comes complete with 30' climbing rope, prusik hitch, lineman's clip and locking carabiner clip — plus a convenient carrying bag.

**S.O.P. TREE DESCENDER** | 83018

In the unlikely event of a fall, our Tree Descender will make it easier to get you safely to the ground. Includes safety rope and two prusik knots for foot holds.

# SAFETY HARNESS

SEAT-O-THE-PANTS ACCESSORIES

**S.O.P. CLIMBING SYSTEM** | 83024 Combo Pack

The combo pack features three complete climbing systems (without carry bags).

**S.O.P. SAFETY ROPE** | 83023

An extra safety rope with prusik knot — but not the accompanying hardware.

**S.O.P. SUSPENSION RELIEF SYSTEM** | 83049

Comes in a handy carrying pouch. Helps relieve pressure on your legs in the event of a fall.

>> **OUR ENGINEERS MADE OUR GROUND BLINDS SO EASY TO PUT UP,  
EVEN THE SALES GUYS CAN DO IT.**

PRE-DAWN IN THE WOODS. YOU ARE FOCUSED. ATTUNED TO THE OPPORTUNITIES THAT ARE POTENTIALLY JUST MOMENTS AWAY. YOUR MIND IS SHARP. IT IS NOT, HOWEVER, INTERESTED IN WASTING TIME DECIPHERING THE NUANCES OF BLIND SET-UP. WHICH HAS BROUGHT YOU TO THE SUMMIT COLLECTION OF GROUND BLINDS. EFFORTLESS TO SET-UP AND EVERY INCH A SUMMIT, THEY ARE, QUITE POSSIBLY, THE ONLY GROUND BLINDS YOU'LL COME ACROSS WITH VIRTUALLY NO UNPLEASANT SIDE EFFECTS.

YOU ARE FREE TO BE A SINGLE-MINDED HUNTING MACHINE, BECAUSE QUITE FRANKLY, WE'VE THOUGHT OF EVERYTHING ELSE WHEN IT COMES TO YOUR BLIND.

Like treestands, our guiding design principles of Safety, Comfort, Silence and Concealment apply perfectly to our ground blinds. Offering two styles of ground blinds — our Run-N-Gun Series and our Ambush layout blinds — both offer quick set-up and comfortable seating for a successful hunt.

**THE RUN N GUN —**

Completely reinvents the tent-style hunting blind.

**THE AMBUSH SERIES OF LAYOUT BLINDS —**

Represent a breakthrough in comfort, concealment and convenience in the field.

Summit's Ambush layout blinds feature the revolutionary FLX-OT digital camouflage pattern especially designed for open terrain.

# GROUND BLINDS

STAND YOUR GROUND

Our new Run-N-Gun Deluxe ground blind sets up in an incredible ten seconds — and takes down in five. It's quiet and roomy (6' x 6' / 69" tall at center) and offers all of the advanced hunting features demanded by hard-core hunters, including large, removable "shoot through" mesh windows, silent side adjustable window flaps, a vented roof, brush loops and tie down straps. The cover is weatherproof, water-resistant, UV-protected 600 Denier material in FLX digital camo on the outside and matte black on the inside.

## RUN-N-GUN DELUXE

MODEL  
87001

## RUN-N-GUN STANDARD

MODEL  
87002

The Run-N-Gun Standard offers all the performance features of the Deluxe model, without the frills. The exclusive inverted high-tension framework sets up in ten seconds and takes down in five. Like the deluxe model, the blind interior is a roomy 6' x 6' footprint with a 69" ceiling at the center. Large "shoot through" mesh windows allow for a quick shot.

Leave it to our engineers to completely reinvent the ground blind. When our customers asked us to design and build a better ground blind, the common complaint they shared with the blinds they were currently using was they were all too complicated and time-consuming to put up and take down. So, we designed a blind that will go up in ten seconds — and take down in five. No kidding.

The secret is the Run-N-Gun's unique inverted high-tension framework that works sort of like an inside-out, upside-down umbrella — only you use your feet instead of your fingers. Sure it's a little different — actually, it's a LOT different — and everyone who tested it in the field thought it was very cool.

**NEW**  
FOR 2010

## RUN-N-GUN MEGA BLIND

MODEL  
87010

Our biggest portable ground blind. At 6'x9'x 74" tall, the new Mega Blind Run-N-Gun is so roomy and spacious you might be tempted to move into it. Oversized, quiet and super-stable, it sets up in an incredible ten seconds — and breaks down in five. With removable, "Shoot Through," adjustable side mesh window flaps, a vented roof, brush loops and sturdy tie down straps, the Run-N-Gun Mega Blind is simply the ultimate multiple-hunter ground blind.

FLX and NEXT G1. The Run-N-Gun blinds feature two of the newest, most innovative camouflage patterns on the market today. FLX is a revolutionary new digital pattern that excels at concealing large objects at both long and short distances. NEXT's G1 is a classic woodland pattern featuring sticks, leaves and other natural elements so it blends into to most hunting environments.

The Run-N-Gun Mega Blind features window flaps that adjust silently and removable "shoot through" mesh screens.

## RUN-N-GUN ULTRALITE

MODEL  
87003

The Run-N-Gun UltraLite is designed for hunters on the go. Built with the same inverted high-tension framework that sets up in ten seconds and takes down in five, the Lite model features a more compact 5' x 5' footprint, 65" ceiling and a lighter-weight 300 Denier material.

The large 48 x 15" window features "shoot through" mesh and the side window flaps adjust silently. Comes in NEXT G1 camo on the outside and matte black backing on the inside.

## PREDATOR

MODEL  
87011

**NEW  
FOR 2010**

Developed specifically for varmint hunters, our innovative new Predator is compact, lightweight, and sets up quickly. Ideal for hunting coyotes, fox and bobcats — the open front design gives you a commanding view while you to blend in to the camouflaged shell behind you. Mesh windows on each side provide 180-degree visibility without compromising concealment. Made from rugged, lightweight nylon fabric and steady fiberglass poles, the Predator is so slick, it might even make you a better caller!

Height: 4 feet | Width: 3 feet | Depth: 2 feet

The Predator blinds feature NEXT's G1 camouflage pattern — a classic woodland pattern featuring sticks, leaves and other natural elements so it blends into to most hunting environments.

## AMBUSH DELUXE

MODEL  
87004

Our new Ambush Deluxe blind offers field hunters all of the advanced features and comfort they want in a premium layout blind — yet it folds up lengthwise to fit in the back of an SUV. The heavy-duty aluminum frame features a unique folding design for easy set up/take down. The 600 Denier polyester shell features the new FLX-OT (Open Terrain) Digital Camo shell. A rugged PVC Bottom is waterproof in up to 4" of water. The roomy, flip-top cockpit features a zippered front for easy clean up. Over 100 stubble straps make brushing out the blind fast and easy.

The heavy-duty aluminum frame features a unique folding design for easy set up / take down. No pins or bolts to freeze up or lose in the mud and snow. The blind folds in half lengthwise for easy transport in the back of an SUV — no pickup or trailer required.

## AMBUSH STANDARD

MODEL  
87005

The Standard Ambush™ features the same heavy-duty aluminum frame with the same unique folding design for easy set up/take down. The FLEX™ OT (Open Terrain) Digital Camo shell is 600 Denier polyester with a durable 1200 Denier polyester floor. With a roomy, flip-top cockpit, zippered front for easy clean up, over 100 stubble straps and handy zippered flagging ports on both sides, the Ambush Standard is the best value in high-performance layout blinds on the market today.

Both the Deluxe and Standard versions feature concealed flagging ports so you can flag distant flocks without opening the door of the blind.

Comfort, concealment and visibility is what it's all about in those gray hours of dawn when the geese start to fly. Our wide-screen mesh window provides a clear view of the sky, but conceals your movements from the eyes above. A fully adjustable lumbar, back, neck- and headrest is so comfortable, it just might lull you to sleep.

The low profile of the Ambush blind makes it completely concealed in the field. Over a hundred stubble straps make brushing out the blind fast and easy.

## DELUXE TRIPOD

MODEL  
82058

**NEW**  
FOR 2010

Designed for elevated hunting in thick brush, sparse vegetation or anywhere else you can't hang a stand. Our sturdy new Tripod is an impressive 10' high at the platform, yet provides rock-solid stability for both security and comfort. Built from powder-coated steel with a spacious steel mesh platform and integral ladder, the comfortable swivel seat allows a 360-degree view. Camouflage railing pads serve as gun rests while dampening sound. The new Tripod is also very easy to assemble in the field.

CAMOUFLAGE SKIRT IS AVAILABLE FROM SUMMIT AS AN ACCESSORY WHEN CONCEALMENT IS CRITICAL. >
