

0 Treestands, Harnesses & Accessories

high performance for high places.

A message from the founder

Fellow Hunters:

Before reviewing this catalog, I hope you will join us in supporting our military for the job they're doing to protect our liberty. Our freedom continues to have a high cost.

With satisfied customers and good products, it's increasingly difficult for us to find improvements but we continue to do so. Once again we've made improvements and added additional products that benefit hunters. The multitude of compliments we receive from Summit users about how our features contributed to their hunting success has certainly placed our staff as being **foremost in treestand design and engineering**. Good design requires the experience of long-time hunters and a formal education isn't the only basis of good engineering; manufacturing technology and cost-value analysis to compete with today's low cost foreign labor are also very important. Summit has it all, so we will continue to set the benchmark for treestands in both 'huntability' and safety.

Here are some improvements we've made. 1) Folding footrests will be furnished on the new "X4" climbing stand platforms. 2) The 'uprights' (angled sides) that the cable goes into are curved for enhanced comfort and to eliminate a minor rattling noise only when moving. 3) The 'hatch cover' that eliminates the cable from possibly retracting is replaced with an automatic cable retention spring. 4) Platform foot-straps and heel cords are replaced with a foot bar on the curved upright to allow twisting your foot to lock the platform for easy climbing control. 5) An improved Bushmaster seat. 6) An improved full body harness. (Incidentally, beginning this year all TMA Certified treestands require that a full body harness be furnished. It's our 5th year to furnish the FBH).

New models are also available. 1) The Cobra X4 which is an open front design but allows standup/sit-down climbing. 2) The HeadHunter X4 and Copperhead X4 which feature quick and quiet tree attachment, are light weight at 11 pounds, and also sport newly designed comfortable folding seats. (It's doubtful that there are any other hang-on that are as simple and easy to hang). 3) The ClearShot, a climber that has a folding seat attached to the platform (it weighs 15 pounds and the optional hand-climber just 2 pounds). 4) An aluminum ladder stand (12' or 18') that requires no 'props' in that it is self-supporting, easy to assemble and erect, and has stay-in-your-seat comfort.

After field-testing these improvements and new models and reflecting back on the past, I'm grateful to all those I've hunted with. We also appreciate those who assisted us with suggestions and especially our employees here at Summit. Our folks are dedicated to quality products at competitive prices but just as important they all understand and focus on what our stands have been bringing to hunters each year: **Security, Comfort, Camouflage and Silence**. Being part of the Pradco/Ebsco team has allowed Summit the freedom for even further growth. Our Pak-Mule and food plot equipment are examples. These successful products are hunter related and they provide benefits to hunters just like our treestands, i.e., they fit our mission.

Making fun of my Dad was a no-no to me, but I failed to pass that on to my own sons. They put me in a white lab coat and refer to me as "lab coat guy" as you may have noticed in some TV commercials. The ads are entertaining and informative but I feel pretty silly. They're finally out-hunting me too, bringing in 10 pointers, elk, videoing friends taking 360 plus bulls, bowhunting African game... even my oldest grandson scored on an elk and a whitetail bowhunting. My 2nd grandson took his first doe and his first buck this season too. However, I consider it a blessing and I'm assured that they and everyone who hunts with us wears their safety harness.

Please do a thorough test on any new treestand you're considering. Try it. Put it on your back. Check out the ease of carrying and weight. Is it quick, quiet and easy to put on the tree? If it's a climber does it climb quietly? How about stability, leveling, and comfort? Is it TMA Certified? Remember, your treestand is a necessity, not an accessory.

Don't forget, Hunt Tomorrow... Wear A Safety Harness Today.

John Woller, Sr.

Summit Viper Climbing Treestand

5 YEAR LIMITED WARRANTY

New cable trigger is the FASTEST and QUIETEST cable attachment system EVER!!
Cable system requires no fumbling with pins, knobs, nuts or bolts... SIMPLE!!

Cushioned bar makes a great place for your gun or bow.

FREE!
Full-Body Harness,
Carrying Straps & 5-Year
Limited Warranty!!

Adjust the seat height for gun **AND** bowhunting.

Super-size platform gives you **LOTS** of room.

RapidClimb
stirrups
INCLUDED!

For several years running, the Viper has been the leader of the pack when it comes to climbing treestands. Features like unparalleled comfort, stealthy silence, and cat-like stability make it a force to be reckoned with.

The Viper, like all Summit climbing stands, attaches to the tree with our snakeable cable technology. This means no more fumbling with pins, knobs, nuts or bolts. Just slide the rubber coated cable into the powder-coated frame and climb.

Gun and bow hunters will appreciate the wrap around bar on the Viper. When the seat is positioned low, the bar acts as a great gun rest. Positioned high, the bar serves as a reference for shots all around the tree while bowhunting.

Gun or bow, the Viper X4 is king. It has all of the features that you need, no matter what type of hunting you do.

Pull the trigger & you're ready to go!

Weight: 20 lbs., Tree size: 8 to 20 inches, Seat height: Adjustable, Overall Size: 20 by 36, Limit: 300 pounds.

Goliath

Climbing Treestand

YEAR LIMITED

FREE!

**Full-Body Harness,
Carrying Straps & 5-Year
Limited Warranty!!**

Snakeable cable requires no pins, knobs, nuts, or bolts.

New cable system is even EASIER than before!

ErgoArms are designed with your comfort in mind.

Wide top frame gives more room.

Seat height adjusts for gun or bowhunting.

350 pound capacity for BIG HUNTERS!

Thick-cushioned arm rests are the ULTIMATE in comfort!

*The absolute **GREATEST** climbing treestand for oversized hunters.*

**Just slide your boots under the new
RapidClimb stirrups and go...IT'S SIMPLE!!!**

**RapidClimb
stirrups
INCLUDED!**

After years of offering full-sized stands for full-sized hunters, we've now gone one step further. The new Goliath X4 is made for the "fuller" sized hunter who wants a backbone of Summit engineering under him.

Rated at 350 pounds, this stand will hold up to the rigors of hunting under a little more "pressure." Really big hunters will appreciate the additional room in the top frame, especially while wearing lots of hunting clothes.

Climbing with the Goliath X4 is great, too. Just sit on the bar and lift the platform. There's no hassling with hand climbers and worrying about upper body strength. It's simple, quiet, and a great way to get to your hunting height.

You ask. We deliver. The Goliath X4 is **THE** treestand you've been asking for. It's got a super-tough hide and a new attitude. Look for it this year at all of your favorite sporting goods locations.

Sit. **Staaaaay.**

For a long day in the woods, which would you rather sit on? We've devoted countless hours to coming up with the perfect combination of foams for our treestand seats.

Weight: 22 lbs., Tree size: 8 to 20 inches, Seat height: Adjustable, Overall Size: 20 by 36, Limit: 350 pounds.

Bullet Backpacker Climbing Treestand

YEAR LIMITED

Silently slide the coated cable and stops into the slot for easy tree adjustment.

New ErgoArms give you the most comfortable treestand available.

FREE!
Full-Body Harness,
Carrying Straps & 5-Year
Limited Warranty!!

*Nylon bushings at pivot points keep the Bullet **SILENT!***

*Thick cushions provide comfort and warmth.
See-through design blends with the branches of a tree.*

*A threaded knob, not a pin, gives the Bullet strength
and silence.*

RapidClimb
stirrups
INCLUDED!

Comfort. Security. Portability. These are just three of the many outstanding features you'll find in the new Bullet Backpacker climbing treestand from Summit.

First and foremost, the Bullet Backpacker will fold **FLAT**. This means you'll be able to store, transport, and pack it better than most treestands available. When you get to your hunting spot, just fold the v-brace down and secure it with the tethered knob. You're ready to hunt in an instant. The Bullet Backpacker features the same structural integrity and all-around functionality of the Viper X4. For bow or gun hunting, you'll be able to use the whole platform knowing it is going to be rock-solid.

Climbing is as simple as standing up and sitting down. Just sit on the padded bar and ease the stand up to a great hunting height. Our new foot-gripping climbing straps grab your boots and give you total control as you climb. If you've looked and looked for a fold-down climber that is secure, comfortable, silent and blends in to the woods, your search is over. The Bullet Backpacker is the stand for you.

Across the pond.

The Summit premium line is still made in America. We think this is important because frankly, we don't like the idea of sending American dollars overseas. Do you?

Weight: 22 lbs., Tree size: 8 to 20 inches, Seat height: Adjustable, Overall Size: 20 by 36, Limit: 300 pounds.

Broadhead Backpacker Climbing Treestand

YEAR LIMITED

FREE!

**Full-Body Harness,
Carrying Straps & 5-Year
Limited Warranty!!**

summfokt construction locks all joints BEFORE welding.

Pivoting uprights fold down for FLAT backpacking.

You're not limited to the "middle" of the stand with a Summit.
Go corner to corner and compare.

Thick cushions give you more time in the woods.

Grip strips grab and hold a tree like no other treestand.

**New RapidClimb stirrups
adjust for large and small boots.**

**RapidClimb
stirrups
INCLUDED!**

A **STABLE** climbing treestand that folds flat? Leave it to the engineering team at Summit to develop the new Backpacker series of climbing treestands. Not only do you still have the same stiff platform for which we're known, but you now have a stand that lies flat on your back.

There are other climbers that fold down. There are other climbers that SAY they're stable. Put 'em on a tree. Go corner to corner and compare. You'll find that they aren't even CLOSE to being a Summit.

Compare the comfort. We could cut costs by giving you a wimpy little foam pad too. But we've hunted long enough to know that if you're uncomfortable, you'll move. If you move, you'll make noise. If you make noise, you're history. And our new ErgoArms are perfectly positioned to provide the best arm rests available.

Compare the cost. Not only do we give you 23 years of treestand industry leadership, we give you a five year warranty and a forty dollar safety harness. You get a lot more for your hard-earned money than just a treestand. You get **the best** fold-up climbing treestand that money can buy.

Not **cast** in stone.

Have you ever seen a cast piece of aluminum break? Casting is great for some applications, but terrible for others, like treestands. Voids or pockets can lead to failure.

Remove the knob.

Fold the brace.

Flatten the stand.

Weight: 21 lbs., Tree size: 8 to 20 inches, Seat height: Adjustable, Overall Size: 20 by 36, Limit: 300 pounds.

Bushmaster **Climbing Treestand**

5 YEAR LIMITED WARRANTY

*New ErgoArms are positioned for the greatest comfort in treestands.
Fully rigged and ready to hunt.*

FREE!
Full-Body Harness,
Carrying Straps & 5-Year
Limited Warranty!!

SummitLokt construction locks all joints BEFORE welding.

NEW

Super-Thick seat provides warmth, comfort and total sitting satisfaction.

With our new RapidClimb stirrups, you don't have to bend over to get your boots into the straps...IT'S EASY!!!

*Go from corner to corner on our platform... then try it on others.
Then get a Summit.*

FREE foot rest included!

The word is out...if you're looking for a great buy in treestands, the Bushmaster X4 is for you. From a super-simple yet effective design to unsurpassed stability, this stand is a bowhunter's dream.

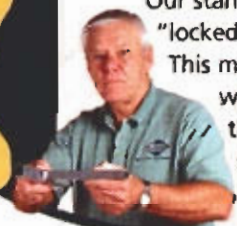

Let's face it; you go to the woods to hunt. Being still and controlling odor are important, but you've also got to have a treestand that doesn't stand out and doesn't make noise. Powder coat paint that doesn't "shine" helps make you disappear into your surroundings. You'll show why we're the ultimate predator because your treestand will be whisper quiet. And you'll score.

Our exclusive SummitLokt technology mimics tongue and groove construction techniques. By locking then welding our treestands, we make them super strong. And with our new ErgoArm cable slide, you'll be dead quiet as you pack into a bucks' home zone.

If you want to stand out in the deer woods, take a look at what's available in other treestands. If you want to blend in and become part of your woods, take a look at a Bushmaster X4.

Locked & Loaded...

Our stands are mechanically "locked" together before welding. This means peace of mind for you when you're 15 feet off of the ground. No other stand does this.

Pull the trigger & you're ready to go!

Weight: 18 lbs., Tree size: 8 to 20 inches, Seat height: Adjustable, Overall Size: 20 by 36, Limit: 300 pounds.

Cobra

Climbing Treestand

NEW

EZ climbing bar gives the Cobra X4 the easiest climbing EVER!!!

**FIVE
YEAR LIMITED
WARRANTY**

Pull the trigger & you're ready to go!

Open-front design won't interfere with gun OR bow.

Padded seat and back rest allow you to hunt long hours.

8,000 pound cable is stiff and won't "drag" up the back of the tree.

FREE!

**Full-Body Harness,
Carrying Straps & 5-Year
Limited Warranty!!**

New RapidClimb stirrups are a cinch to use.

**RapidClimb
stirrups
INCLUDED!**

Just like it's deadly counterpart, the Cobra climbing treestand from Summit can help you deliver a lethal blow. You'll be poised to strike and silent, two

attributes that your quarry will discover too late.

Silence is one of the key features of the Cobra. You'll glide effortlessly to your hunting spot and wrap your stand around a tree with absolutely no noise. The new EZ Climbing bar makes climbing simple because it turns your Cobra into a stand-up, sit-down climber. Then just fold it up and out of the way and you're ready to hunt. Once you're positioned, the SummitLokt technology that locks then welds your stand becomes apparent. You're rock-solid and dead quiet.

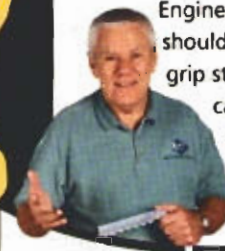

The open front design of the Cobra makes it possible to strike from many different angles. Shots behind the tree, straight down, and to each side are easy to make. You won't have the excuse of saying "he came in behind me" anymore.

From simple design to amazing stability, the Cobra is full of whitetail-bagging features. Give one a try and you'll score more than ever.

q, r, s, t, u, V.....

Engineering is important to us, and should be to you. Our "V" shaped grip strips weren't an accident. We carefully analyzed many shapes before deciding on the one that grips the tree best.

Fold the climbing bar down and climbing is EASY! Fold it out of the way to hunt!

Weight: 18 lbs. (w/o EZ Bar), Tree size: 8 to 20 inches, Seat height: Adjustable, Overall Size: 20 by 36, Limit: 300 pounds.

Mini Viper

Climbing Treestand

Pull the trigger & you're ready to go!

Perfect for small-framed hunters.

Dual seat foams won't bite your sides yet remain soft.

Mini-sized platform still gives **MAXIMUM ROOM.**

Locked construction means **TOTAL SILENCE.**

FREE foot rest **INCLUDED!!**

Every few years a new member of the Summit pack comes along that is destined to be a leader. The Mini Viper combines the features of our "full-sized" Viper in a lighter, more compact climbing treestand.

At a mere 17 pounds, the Mini Viper is one of our simplest stands to pack. And being a real lightweight, it climbs and maneuvers easily around all sorts of obstacles. You'll feel like you're in a magnum-sized stand without the extra weight.

For 2004, we've improved it even more. New foot-gripping climbing straps give you complete control as you climb. As a bonus, they're adjustable for early or late season boots.

Summit has always been the leader in the treestand industry. This new stand reemphasizes our commitment to give you what you're asking for. If you're a smaller framed hunter and need a stand that will fit you, check out the Mini Viper.

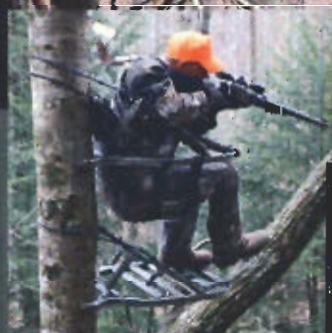

If you lose 'em, you lose.

Lose a wing nut, pin or knob on your way to your tree, and your hunt is over before it starts.

Summit stands are designed so there is nothing to lose. Join a winning team.

New RapidClimb stirrups make climbing **SIMPLE!!**

Weight: 18 lbs., Tree size: 8 to 20 inches, Seat height: Adjustable, Overall Size: 20 by 32, Limit: 300 pounds.

ClearShot Climbing Treestand

YEAR LIMITED WARRANTY

NEW tapered seat folds **COMPLETELY** out of your way.

NEW for 2004!

Seat is tapered in the front for **TOTAL COMFORT!**

Open-front design won't interfere with gun OR bow.

NEW cable system is the easiest ever invented.

8,000 pound cable is stiff and won't "drag" up the back of the tree.

Bushings at pivot points eliminate squeaks.

FREE!

Full-Body Harness,
Carrying Straps & 5-Year
Limited Warranty!!

Engineered construction is locked together, then welded.

Platform designed to pack in MILES if necessary.

How often have you wished for the simple old days? We've been there, too. With the introduction of the ClearShot climbing stand, we're taking strides towards simplicity.

The ClearShot has the features of the original Summit climbing stand with 2004 technology. You'll love the easy hand climber-type climbing, comfortable, fold-away seat, and **TOTALLY** open view of the woods around you. Bowhunters in particular will appreciate the fact that you're completely unobstructed from shooting around the tree.

If you're the type who doesn't like carrying a hand climber, then you're looking at a 14 pound treestand. And if you add the hand climber it's only 16. So now your hidden-away, not-so-often-hunted spots become more accessible. The new ClearShot. It's a back-to-basics way to become a more effective whitetailer.

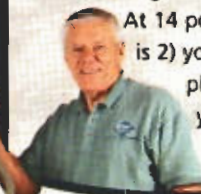

The new cable system is the fastest yet!

Want a light?

Here it is. An aluminum climber designed to take you to new places.

At 14 pounds (optional hand climber is 2) you'll pack this stand into places you never dreamed you'd see.

Weight: 16 lbs., Tree size: 8 to 20 inches, Seat height: 22", Overall Size: 20 by 32, Limit: 300 pounds.

Headhunter

**FIVE
YEAR LIMITED
WARRANTY**

A larger seat for '04 means more comfort.

The seat will pivot SILENTLY and COMPLETELY out of your way.

Innovative hanging bracket pivots to make hanging the EASIEST EVER!

Strap system is quiet and stronger than most chains!

FREE!

**Full-Body Harness,
Carrying Straps & 5-Year
Limited Warranty!!**

Works GREAT, even on LEANING TREES!!!

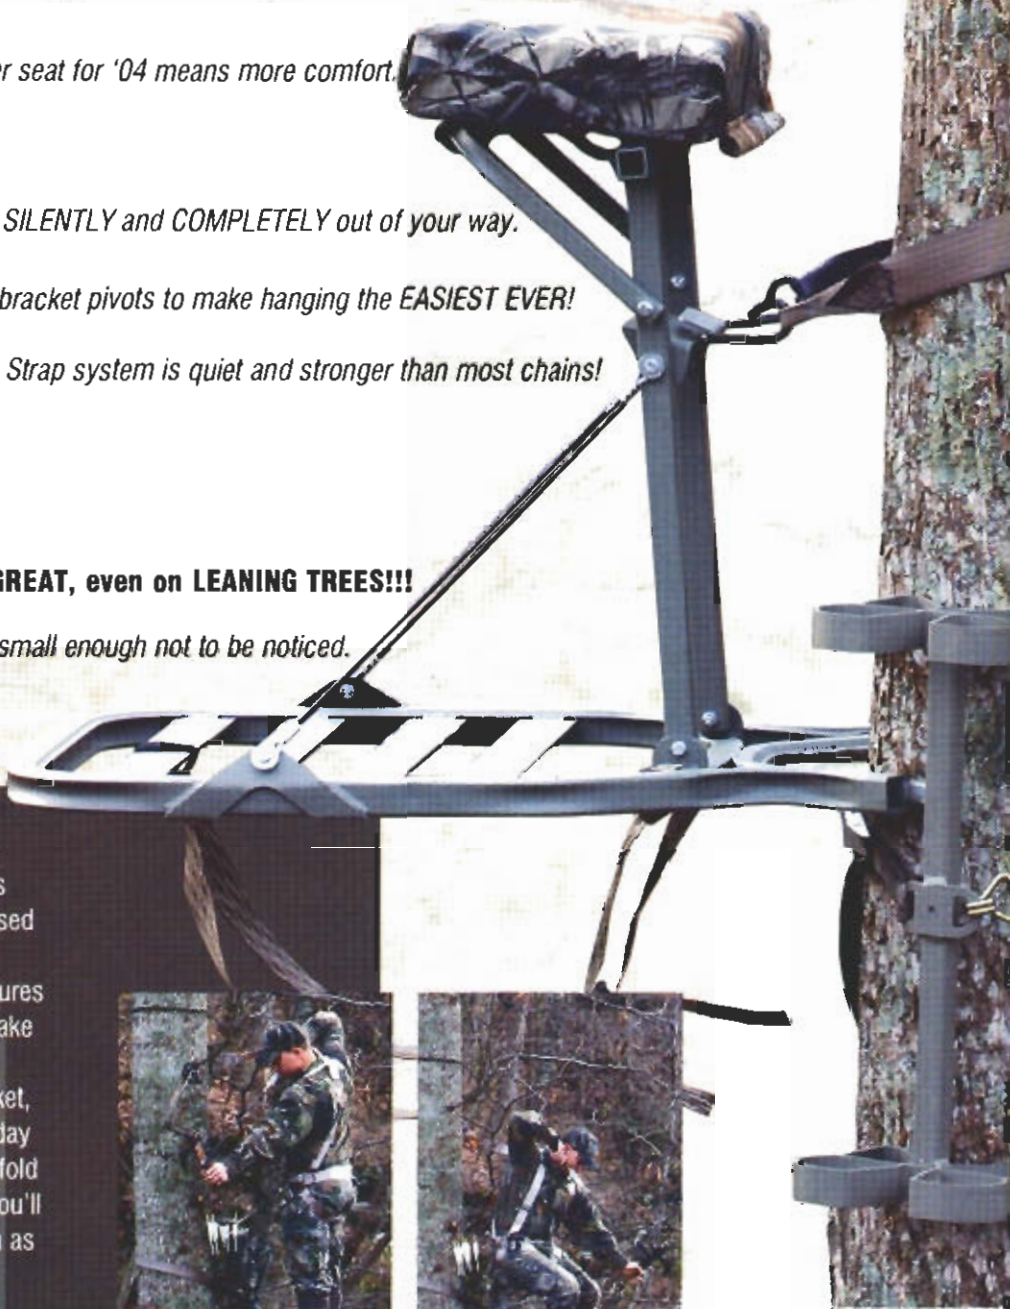

Platform is large enough to move around on and small enough not to be noticed.

The popularity of our Headhunter series, especially the Headhunter Lite, had hunters asking for the next generation. We're pleased to announce the Headhunter X4.

The Headhunter X4 has the superior features of the Lite, with a few new features that make it even more of a hunter. The new seat design, unlike every other seat on the market, won't bite the back of your legs. Hunt all day in total comfort and when it's not needed, fold it completely back and out of your way. You'll get more platform "real estate" to move on as you position for a shot.

At only 10 pounds, the Headhunter X4 is easy to pack. Just throw it on your back and go. You'll go into areas others can't because their stands are too heavy.

Look into fixed position tree-stands. Check out price, features, and warranty information. We'll bet you'll choose a Summit.

The Headhunter and Copperhead both use

Weight: 10 lbs., Tree size: 8 to 20 inches, Seat height: 22", Overall Size: 20 by 32, Limit: 300 pounds.

Copperhead

YEAR LIMITED

NEW

Super-Thick seat provides warmth, comfort and total sitting satisfaction.

Hangs in seconds and is a breeze to move.

New thick seat won't bite the back of your legs. Easily folds out of your way.

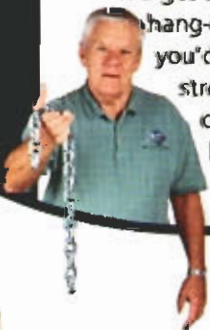

Go from corner to corner on our platform... then try it on others. Then get a Summit.

Fully rigged and ready to hunt.

FREE!
Full-Body Harness,
Carrying Straps & 5-Year
Limited Warranty!!

The Chain Gang

To get the same strength as our hang-on strap, this is the chain you'd have to use. So how strong IS that wimpy little chain on your current hang-on treestand?

the Quickest, Simplest and Quietest hanging method available.

Two years ago we introduced the Copperhead non-climbing treestand. It worked on leaning trees, had a comfortable seat, and sported a hanging system unlike any other treestand. For 2004, we're reintroducing it as the Copperhead X4.

We improved the hanging system by incorporating a strap instead of cables. This means whisper-quiet operation as you place your stand in a big bucks' living room. He'll never know you're around because of the simplicity of the Copperhead.

The seat is another improvement. It's wide enough to keep it really comfortable and just small enough to be able to fold it out of your way. And it can be removed to keep it dry. With its' generous platform dimensions, the Copperhead looks like it would be heavy. Looks can be deceiving though, because at only 12 pounds, it's a breeze to pack. The Copperhead X4. Designed to be a "real" hunters' treestand.

Weight: 12 lbs., Tree size: 8 to 20 inches, Seat height: 22", Overall Size: 20 by 36, Limit: 300 pounds.

MegaSampson Ladder Stand

YEAR LIMITED
WARRANTY

FREE!

**Full-Body Harness,
Carrying Straps & 5-Year
Limited Warranty!!**

NEW

An Easy-To-Use Summit-Made ladder stand.

WIDE footprint makes climbing a breeze.

Summit comfort in a ladder stand??? You better believe it.

*Custom extrusion is similar to an I-beam...**VERY STRONG!!!***

*Locks tight to the tree from the **GROUND**. No more climbing wobbly ladders **hoping** you can secure it at the top.*

12 and 18 foot tall models available.

You've known us for years as a climbing or hang-on stand maker... this year you'll get to know us as a quality ladder stand maker. Introducing the MegaSampson.

With Summit quality built-in, the MegaSampson has been years in the making. From its' wide, solid stance to its' roomy platform to its' waaaaay too comfortable seat, the ladder stand market is going to be taken by storm.

A unique cross strap connection system gives the MegaSampson stability from the ground up. Just lean it against your favorite "killin'" tree, cross the straps behind the tree, and cinch it down for total stability. You'll climb without the usual wobbling and shaking you've grown accustomed to with other ladders. And once you've reached the top, settle back into the Rolls-Royce of treestand seats. Being uncomfortable is not an option.

The MegaSampson: Twenty-three years of manufacturing expertise bundled into an easy to use, affordable ladder stand. And it's a Summit!

The ladder to success...

You've always known Summit as an originator, not a duplicator. When we set out to build a better ladder, we knew it had to be better than anything available... and it is.

12' Weight: 43 lbs., 18' Weight: 57 lbs., Tree size: 8 to 20 inches, Seat height: Adjustable, Overall Size: 18 by 36, Limit: 300 pounds.

Trophy Chair Tree Seat

Hangs on a tree in seconds!

Padded arm rests eliminate shoulder fatigue.

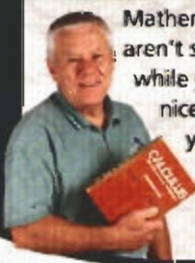

Dual foams provide the ultimate in comfort.

Use it with your favorite hang-on or ladder stand!

Position the Trophy Chair just above the ground for the most awesome turkey seat in the woods!

Easy as *Pi*.

Mathematical computations aren't something you think about while you're hunting. But isn't it nice to know that with a Summit, you've got 23 years of tree-stand expertise in engineering under you?

Is THIS
what
you're
used to
sitting on?
We can
do **LOTS**
better!

How many times have you wanted to hunt deer, squirrels or turkeys in your favorite hardwood bottom, doves on a field edge, or ducks in flooded timber, and not had a comfortable place to sit? If this has ever happened, you might want to take a look at the Trophy Chair multi-purpose tree seat.

The first thing you'll notice about the Trophy Chair is that it's extremely comfortable. Soft foam in the seat bottom makes your wait in the woods easy. The padded arm rests eliminate shoulder fatigue and give you a great place to rest your arms while positioning for a shot.

At a mere six pounds, the Trophy Chair can be easily back packed into the most remote areas. You won't even know you're carrying it because it can be packed just like your rifle on a sling.

Once you've found a suitable tree, you can be set up in seconds due to the quick tree attachment of the Trophy Chair. And if you need to move to another location, you can do it quickly, quietly and effortlessly. It doesn't matter if you're a weekend warrior or a seasoned veteran in the woods, the Trophy Chair can make your time really enjoyable. Take a look at one and stay comfortable.

Weight: 6 Pounds, Tree Size: 8 to 30, Seat Height: Adjustable, Limit: 260 pounds

**FIVE
YEAR LIMITED
WARRANTY**

Custom extrusion is cost-effective and provides superior strength.

*The **EASIEST** climbing system available.*

A cam-buckle securely attaches each Bucksteps section to the tree.

Summit Bucksteps

After just one year out, Summit's new Bucksteps are taking the stick, step and ladder world head-on. If you've ever hunted a less-than-perfect spot because of limitations with your current climber or hang-on stand, you're going to love Bucksteps.

Bucksteps are the result of hunters just like you, who needed and wanted a simple, lightweight system of climbing steps. Bucksteps attach to the tree individually, which means you can attach them where you want. Additionally, you'll be able to put **BOTH** feet on one step to hang a stand. You'll be able to climb trees that in years past you've just looked at and walked on by. The cam-buckle attachment system secures quickly and quietly, which in turn gets you in a tree and hunting more quickly and quietly than any other system.

From the super simple attachment system to a weight that's next to nothing, Bucksteps will add miles to your hunting area. Pack 'em in with you and SCORE!

Bucksteps nest together to make them the most advanced tree climbing steps available.

SUMMIT SwifTree Single Pole Climbing Stick

**FIVE
YEAR LIMITED
WARRANTY**

*Three slip-fit sections extend to **17 feet**... a great hunting height!*

*An economical way to reach a **GREAT** hunting height!*

Standoff design gives you plenty of room for a solid foothold.

Welded steel provides a non-flexing, stable structure.

*Unique stirrup design **captures** your foot.*

The SwifTree Climbing Pole from Summit is one of the greatest innovations tree climbing has ever seen. It anchors securely to a tree and provides a great method of getting into hang-on or fixed-position climbing stands.

The enclosed foot steps of the SwifTree provide super stability without sacrificing safety. We "capture" your foot with an enclosed step and virtually eliminate the possibility of your boot slipping off of the end of the step.

Welded steel provides the super-rigid backbone of the SwifTree. You won't find any noisy bolts or rivets that could make noise as you climb. Just slip the three sections together, lean it against a tree, and secure each section as you climb.

At seventeen feet, the SwifTree will let you achieve a great hunting height. You'll appreciate it even more when you see it's price!

Three sections are easy to pack in and set up... just slip them together.

Weight: 17 lbs., Height: 17 feet, Limit: 260 pounds.

Pak-Mule ATV Trailer

Fold up and secure the Pak-Mule and you're ready to ride. When you need extra room on your 4-wheeler, just fold it down and load it up.

Ever wondered just how you were going to get your treestand, gun or bow, extra camo, backpack, and other hunting "stuff" on your 4-wheeler? Introducing the Pak-Mule.

The Pak-Mule is a multi-purpose 4-wheeler trailer with several unique "kicks." For starters, it will fold up for transport in the back of your truck or on your 4-wheeler trailer. Second, the Pak-Mule has independent suspension made possible by two 450 pound adjustable shocks. We did this for you farmer wannabe's who carry seed, fertilizer, and an assortment of other farm items on your 4-wheeler. You'll have ample room to carry lots of extra cargo to and from your truck or trailer.

We've all needed a little extra room on our ATV. The Pak-Mule gives you the flexibility to easily add room when you need it, and fold it up and out of your way when you don't.

The Pak-Mule's adjustable trailer hanging bracket fits most composite and tubular steel 4-wheeler racks. Durable 4-ply tubeless tires are super for many types of terrain.

Hauling big game out of the woods on a 4-wheeler can get scary at times. The Pak-Mule makes easy work out of it. It works great for hauling seed, fertilizer, firewood, fencing, and a whole lot of other stuff, too.

Optional 55 gallon spray rig!

The Pak-Mule electric broadcast spreader mounts on the rear of the Pak-Mule trailer with a quick detach receiver. It is ideal for planting food plots, gardens, and lawns.

The Pak-Mule's independent suspension makes 4-wheeling through rough terrain easy. The shocks are adjustable for various load conditions and levels of ground clearance which means you can customize it to your type of work (or play.)

Plot-Mule High-Speed Disc Harrow

The Plot-Mule High-Speed Disc is the answer to your food plot questions. From deep, hard ground discing to shallow, sandy soil seed covering, the Plot-Mule does it all.

Just enough weight makes the Plot-Mule awesome for those hard-to-reach places you've always wanted to plant. Even ground that's never been disced will soon look like Momma's garden thanks to the hefty sealed bearing plates. And you'll put in twice as many plots as you would with other ATV discs because it's designed for higher speeds.

When the work is done, just crank it up and go. The Plot-Mule will do it all from start to finish... and in record time.

No time for slow time... take off and get it done QUICKLY!

The Plot-Mules' offset discs won't "chatter" and "crow hop" like other discs.

Easily adjustable disc depths and angles (0 to 20 degrees) provides line of draft control for varying soil conditions.

Weight: 425 pounds, 2" ball, Amount of Dirt Thrown: Lots.

throw some dirt

AVAILABLE!!!

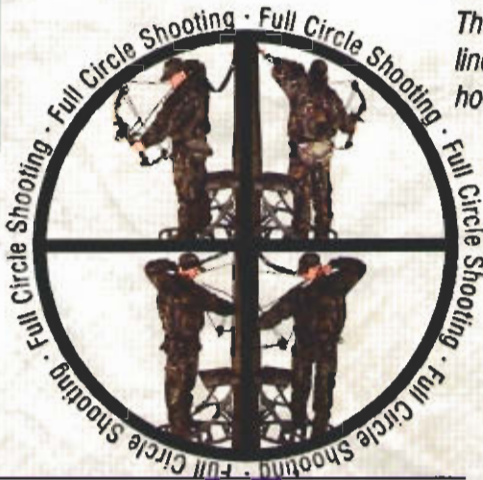

The safety harness all packed up. When you're ready to hunt, just pull out the shoulder and leg straps and go. The built-in storage pouch keeps your harness tangle-free. 6,000 pound polyester webbing is SUPER-STRONG!

The Seat-O-The-Pants harness shown in Fall Woods camo webbing. The high tether doesn't interfere with your shooting. Quick release buckles assure easy, silent installation. The safety line easily converts to a lineman-style climbing belt (extra hook provided.)

Can be worn
Over or
Under your
clothing!

Mention safety harnesses while talking with your hunting buddies, and chances are that the Seat-O-The-Pants name will come up. That's because for 10 years, the SOP harness has been the leader in treestand safety equipment.

From the original Seat-O-The-Pants that fits neatly into a built-in carrying pouch, to the new SOP FastBack with its' tangle-free, sewn-in back designed for the hunter on the go, we've got the harness to fit your needs. For the fixed-position stand hunter, we offer the Climbing System (shown at left), which keeps you securely hooked up from the time you leave the ground to the time you safely return.

Check out the offerings on this page as well as in the accessories section of this catalog. You'll find all the safety equipment you'll need to be confident while chasing trophies.

SOP FastBack Safety Harness

**BRAND
NEW
FOR
'04!**

Locate your duffel bag.

Yank your harness out of the duffel bag.

Throw on the FastBack.

Take off huntin'!
