

You've Got to Have Heart! Program Focuses on Creating Awareness.

In the month of February, Vitronic Promotional Group's products allow companies to make a difference by creating awareness and education for living heart healthy every day.

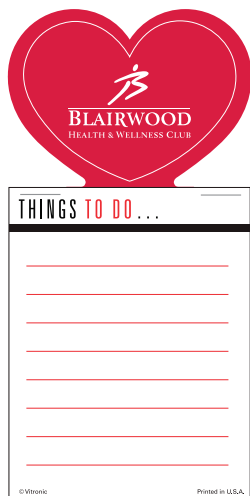

It is proven that the more you protect your heart especially early on in life, the less likely you'll face the challenges posed by heart disease. Some of the ways to prevent heart disease is to know your numbers; cholesterol, blood pressure and triglyceride counts need to be monitored so that individuals can work towards lowering them. Next is to educate yourself on how to lower your counts, the keys are exercising daily and eating heart-healthy meals and snacks as directed by the American Heart Association.

The goal of the Go Red For Women Movement stands for the ability all women have to improve their health and live stronger, longer lives. They are working hard at the goal of changing the perception that heart disease is a "man's disease" when in fact it is the number 1 killer of women in America.

Vitronic Promotional Group is creating quite a buzz in the industry due to their A285 Printed Striped Economy Tote that supports the movement. It is the Red Dress that is printed as an accent on quality cotton sheeting flat tote to accompany your company's logo. It is a perfect tote handout that can be filled with important health information to educate and create awareness of heart disease. This will also show that your company is committed to promoting heart healthy living everyday. If this tote is not to your liking, there are plenty of other choices to get your message across with over 160 products in red.
