Introducing the Wingscapes BirdCam

The Wingscapes BirdCam captures digital photos and videos of your birds while you are away. Weatherproof, motion-activated, and easy to use, this revolutionary tool will enhance how we observe, enjoy, and learn about wildlife.

Why have a BirdCam? The BirdCam helps us rediscover the birds we thought we knew and provides a new way to watch, enjoy, and share birds...

- **Get closer...** with a BirdCam, the secret lives of birds are revealed in stunning clarity and color.
- **See what you've missed...** the BirdCam watches your feeders while you're away, so you can watch whenever you want!
- **Share your birds...** now it is easier than ever to share your birds – through email, printing, video-sharing, and the web.
- **Citizen Science...** already in use by field biologists, the BirdCam is perfect for citizen science and school projects.

How does the BirdCam work? Wingscapes has designed the BirdCam to be very easy to operate and can be used minutes after unpacking. An infrared sensor detects birds and takes either digital photographs or 10-second video clips while you are away. Images can be viewed on a TV or downloaded to computer for printing or email. The BirdCam also works in Timelapse and Manual modes, and has a remote control which can trigger the BirdCam from 30 feet away. The easy menu system allows users to select preset, "EASY" programs or adjust settings to suit their needs.

BirdCam Features:

- Setups quickly and involves no wires
- Laser aim device for aiming accuracy
- 4 shooting modes: Auto (motion-sensitive), Timelapse (user sets interval), Remote Control, Manual
- 32 MB internal memory; SD card slot accepts cards up to 4 GB
- Engineered to minimize "False triggers" caused by feeder movement
- Long battery life – 4 D-cells last at least 30 days under regular use (batteries not included)
- BirdCam comes complete with Remote control, USB cable, TV out cable, stretch cords for mounting, and user guide.

Available Accessories:

- BirdCam Bracket** – this adjustable "arm" is used to mount the BirdCam to almost any common feeder pole.
- BirdCam AC Power Adapter** – use this 6-foot AC power cord to run the BirdCam without batteries.

We've found that the BirdCam's pictures and videos are worth a thousand words. To see what the BirdCam is capable of, visit us online:
