

Crimping Pliers

Instructions:

Right Handed - Use the pliers in your right hand and crimp the right side of the book first.

1. Hold the pliers so the **red dot** is face up.
2. Align the pliers so the teeth are just below the center of the coil.
3. Squeeze the pliers to cut the coil and keep closed.
4. Twist towards the right to bend the end of the coil.
5. Release the pliers, flip the book over end for end and crimp the other side using the same procedure.

Left Handed - Use pliers as described above but hold them in your left hand and put the **red dot** down. Twist to the left after cutting.
