

# INTRODUCING THE PC-248

## EZ4U Punch & Electric Coil Insertion System

The first fully featured Manual Punch and Electric Coil Inserter with Heavy Duty Features at an affordable price. Offers significant productivity gains through operator driven common sense solutions.

## NEW PUNCH & ELECTRIC COILING SYSTEM

### PC-248 Punching Features:

- "Over the Top" Punching Power Handle:**  
 Provides a smaller less intrusive foot print allowing the unit to fit in a limited space area, next to walls or in corners; no side handle to protrude into adjacent work areas. More importantly, two hands can be used to punch heavier lifts, cover stocks, laminations and other plastics. Reduces operator fatigue and increasing productivity.
- NEW Punch Pin Design:**  
 Provides smooth and clean punching with significantly less effort than ever before. This combined with the Power Punching Handle will punch more with less effort. Additional Productivity Gain.
- Exclusive X-Capacity U-view Waste Tray:**  
 Like the other Rhin-O-Tuff punches this unit will never have down time due to out of sight waste tray overflows. Waste is always in view on a Rhin-O-Tuff.
- Exclusive AccuSet Micrometer Paper Stop:**  
 Paper stop setting has never been as easy even for new operators. Sets up fast and accurate on all documents.
- Quick-Set Punch Pin Pulls:**  
 Easy and accurate pin disengagement on all standard sizes.
- Open Throat and Register Pin:**  
 Easy setting for punching large format documents.
- Hole size is .248 pitch X .187:**  
 Hole size recommended by nearly every major manufacturer. Provides a larger hole for easier coil insertions and less worry with adequate hole to edge of sheet margins. Matches hole patterns used in most major production centers reducing possible hole compatibility problems. However any Coil Die Pattern can be provided.

### PC-248 Rhin-O-Roll Inserter Features:

- Superior Grip Powered Upper Roller:**  
 Using oversized roller provides adequate power for nearly any size coil. Combined with the special superior grip rubber formula the job is easier than before.
- Exclusive 5-way Adjustable Lower Roller:**  
 This free wheeling roller, while not powered, is adjustable to three settings wide as well as angles for smaller documents. Effective when coiling books 20mm and up or odd sized documents in smaller sizes.
- Built in Book Former:**  
 Assist the operator in shaping the document for easier coil insertion.
- Air Cooled Electric Power:**  
 Our Rhin-O-Roll inserters are designed to run continuously because they are air cooled. Therefore foot pedal operation is not necessary as they can be left on without worry about heat damage. Our 1 year factory warranty is your assurance of our confidence. Though not recommend, foot pedal operation can be provided.
- Optional Attached Crimper Head:**  
 The unit includes 1 ea. crimping pliers. In addition, The PC-248 is designed to allow for a soon to be announced, "Attachable Crimper Head", and thereby eliminate those lost or misplaced pliers.
- Quality Assurance:**  
 The Rhin-O-Tuff logo is your assurance of quality and our reminder that we must always maintain that same quality in each and every product we introduce. Our users are our best endorsements and we work hard to assure they always will be.
