

Model 7000 12" Laminator

Durable - Reliable – Affordable

Heavy duty metal constructed laminators are equipped with adjustable thermostats & a standard 3-way switch. Warm up time is two minutes. Made in the U.S.A.

7000 Model includes the following features:

- Metal case construction.
- Fan cooled outlet table, positioned to prevent "lost" cards.
- Finned heat sink for additional cooling.
- Illuminated power switches serve as a reminder and a warning.
- Illuminated ready signal.
- Brushless gear motor for long trouble free life.
- All electrical components are mounted to grounded chassis.
- Carrier is not required to laminate 5/2 - 5/2 or thicker pouches.
- Molded silicone rollers to withstand elevated temperatures.
- Porous bronze bearings are permanently lubricated.
- Built in thermometer is optional.

Machines carry a five year factory warranty against defects or wear out. After warranty expires, machines will be repaired for a flat fee of \$15.00 (not including return shipping).

Machines are UL listed and CSA approved. 230 volt machines are available with TUV Rheinland certification.
