

# Simple Coil Plastic Coil Binding Machine

HP2109A

Avoid the hassle of manually inserting your spiral coils by hand. The Simple Coil binding machine combines the hole punch power you need to create perfect perforations along with a sensible and easy way to insert your coils - all in one machine. For small to medium jobs, the Simple Coil is just that...simple! It's a great alternative when you compare the time and frustration spent when faced with manually inserting a spiral plastic coil one hole at a time.

As a manual coil punch and electric coil inserter in one, the Simple Coil offers a complete system at a very affordable price. It has the punching capacity for up to 10 sheets (20lb paper) and spiral binding capacity for up to 250 sheets. With a 4:1 pitch, you'll have 4 perfect holes per inch. Then, simply use the electric coil inserter to spin the coil through your holes. Spiral coil bound materials offer the convenience of a spiral bound notebook with pages that lay flat, making them easy to handle and even easier to read.

Increase your productivity with 2-in-1 convenience and affordability. It just makes sense! Order your Simple Coil today and see for yourself!
