AVJ422KB4

Step 1   **MOUSE SHELF ASSEMBLY**

(Note: For the mouse shelf to pull out to the right, use the first set of holes on the left side and the third set of holes.)

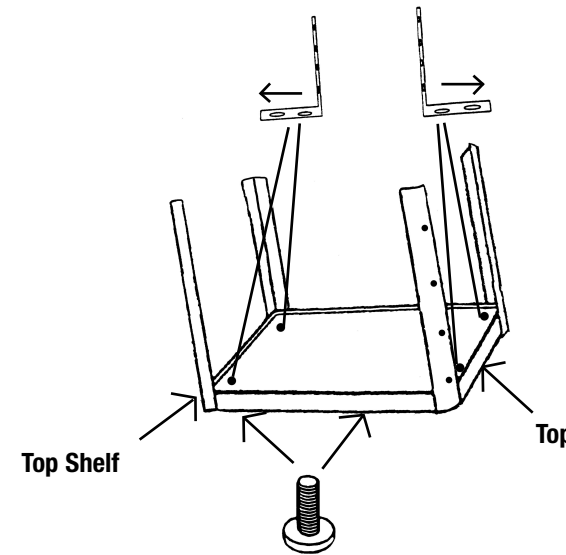

Mouse shelf rail

Attach the mouse shelf support bars to the first holes and third holes on the bottom of the keyboard shelf with 4-sheet screws. Then align the brackets on the mouse shelf to the holes on the support bars and attach using 8 sheet metal screws.

Mouse shelf

Runners shown attached for illustrative purposes, do not attach until step 4.

Step 2

Mount the four L-Brackets to the holes on the top shelf using 4- bolts, 4- washers and 4- nuts. Be sure brackets are pointing outward. Then align the two threaded holes on the side of the runners to the hole on the brackets and attach with two pan head screws. Do the same to the other side.

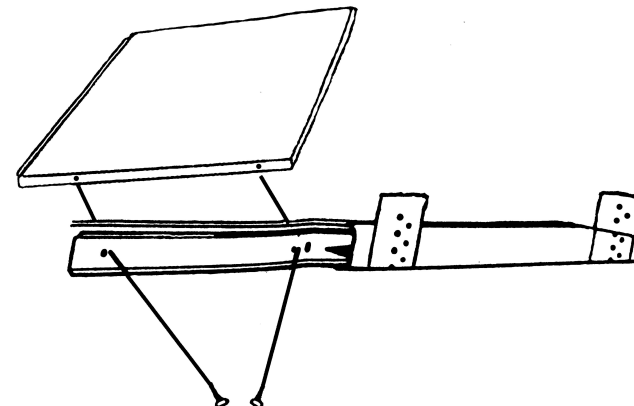

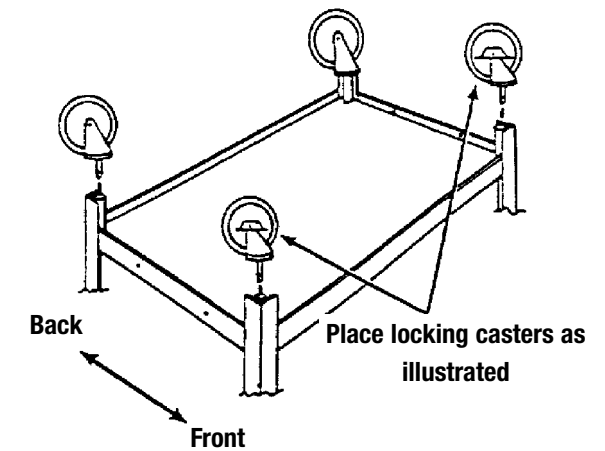

Top Shelf   Top

Step 3

Repeat step 2 for second shelf.

Step 4

Extend runners outward and align the holes on the side of the keyboard to the first hole and last hole on the slides, and attach with two sheet metal screws on each side. Repeat for second shelf.

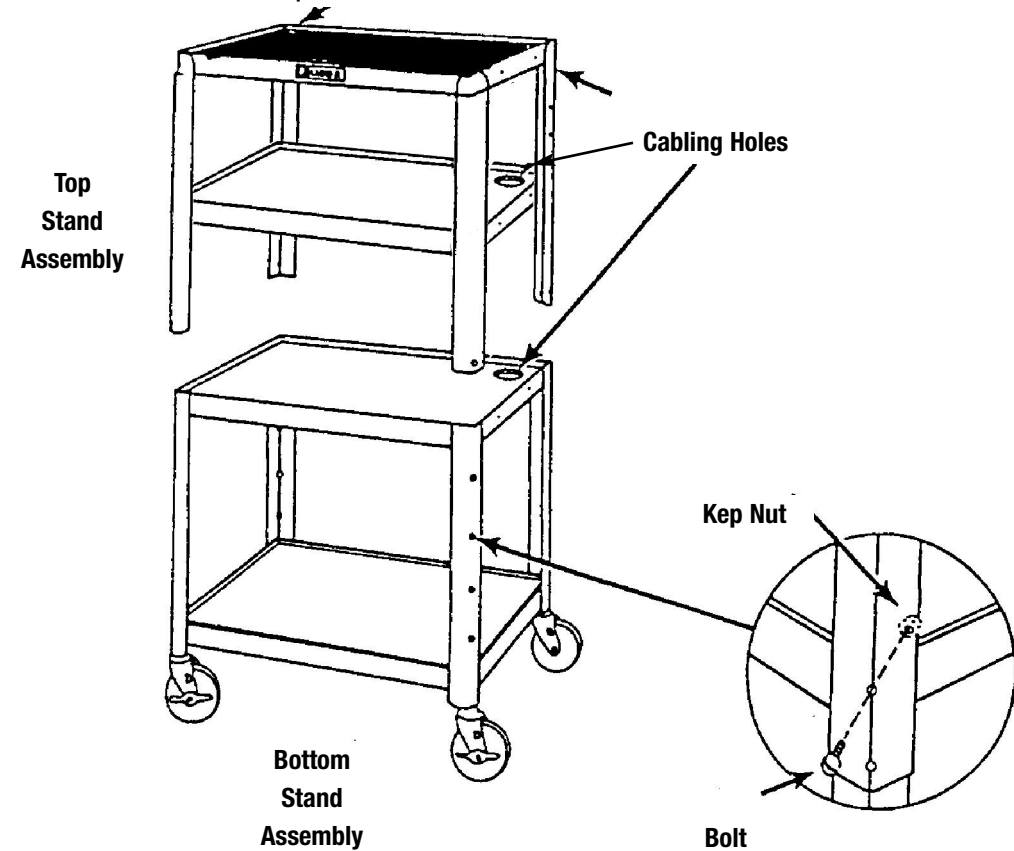

5. Turn bottom stand assembly upside down on a smooth surface. Push the four casters firmly into the caster socket holes in bottom of each leg as illustrated.

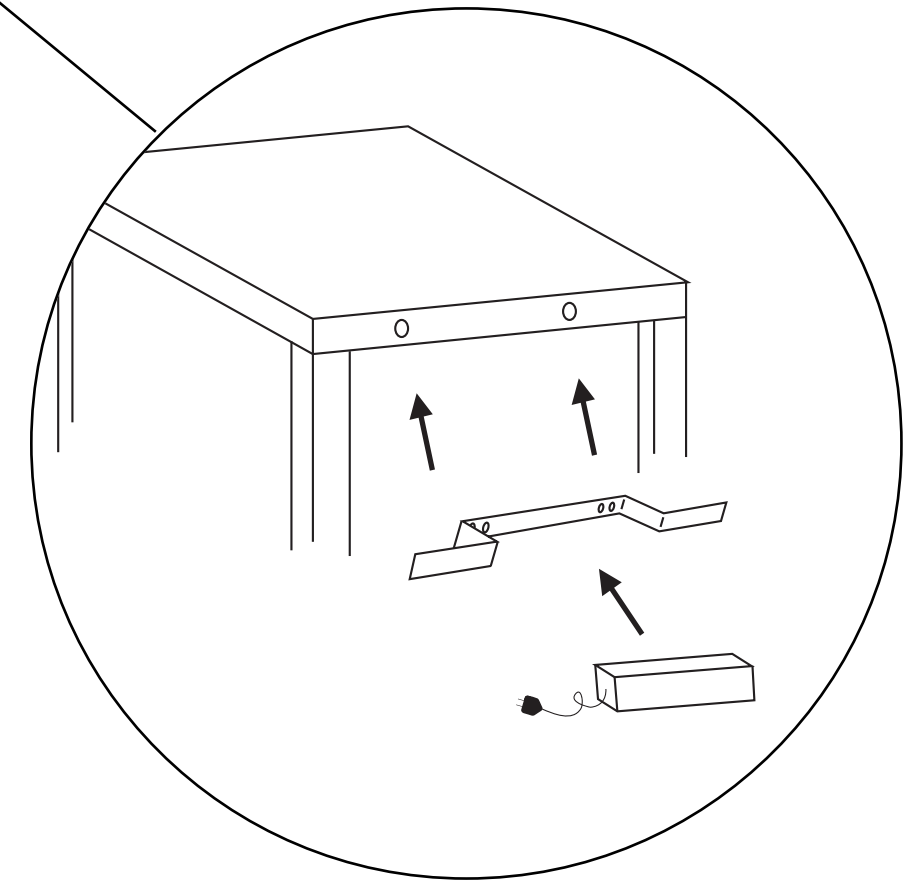

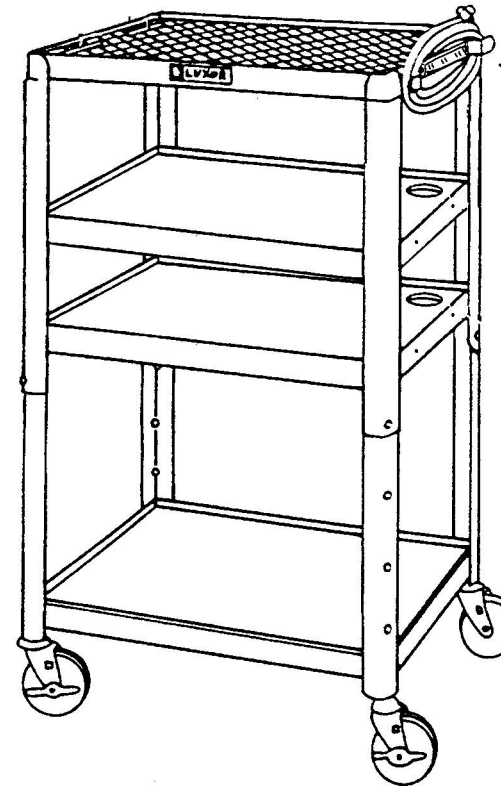

Back

Place locking casters as illustrated

Front

6. **a.** Attach second shelf to top stand assembly at desired height using 4 bolts and kep nuts. Position top stand assembly over bottom stand assembly, as illustrated.

Note: Be sure cabling hole in corner of top and middle shelves line up on top of each other.

b. Adjust top stand assembly up or down to desired height. Align holes in all four legs, insert bolts and fasten with four kep nuts, as illustrated. Place rubber mat on top shelf.
