

# NOTICE

OCCASIONALLY...due to transit

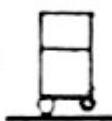

a table may arrive that rocks

sometimes appears lopsided and uneven

or one leg seems short

even though the table was manufactured perfectly level, inspected and packed in the best shock-proof carton attainable with proper inner packing.

## HOW DOES THIS HAPPEN?

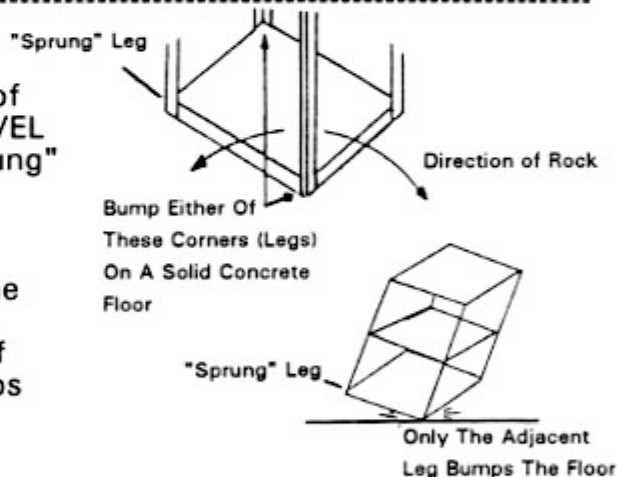

IF, DURING SHIPMENT, a trucker drops the carton off a platform or truck, so that one corner strikes the ground with sufficient impact, that corner may be "sprung" upwards. This is the origin of the so-called unlevel table. When you take this table out of the carton and set it on the floor (minus the casters) it sets on only 3 corners. The 4th corner that was "Sprung" upwards does not touch the floor, so the table rocks.

## HOW TO CORRECT:

The same type of bump that caused the table to be out of alignment will correct it! **THE TABLE CAN BE MADE LEVEL** again by bumping either of the legs adjacent to the "sprung" leg.

**FIRMLY GRIP THE TOP SHELF** with both hands. Raise the table up about 10 inches...then bump the table on the floor taking care to strike one of the legs adjacent to the "sprung" leg...After the bump, set table on floor to see if it still rocks. If it does, bump it again. One or two bumps will usually re-align the table.

## DOES THIS AFFECT THE TABLE?

Does re-aligning affect the strength for the table? **NO.** The welds are unaffected as they remain rigid. The steel is resilient with the inherent ability to alter and re-alter its shape while retaining its original strength. The real problem is psychological. You get annoyed when a table is delivered to you that is not level. *So if you ever get a table that does not sit level...and it was caused by a fall, you can save worry and delay simply by one or two well placed bumps.*

## CLAIMS FOR DAMAGE IN TRANSIT

IN CASE OF ACTUAL DAMAGE, ask the driver of the Carrier to write "Received in Bad Order" on delivery schedule. Carrier is responsible for safe delivery of equipment. If concealed damage is discovered after unpacking, request transportation company (within 48 hours) to make out a "Bad Order" report. These procedures protect your right to recover from the carrier. Be sure to notify your dealer of action taken.

**DO NOT RETURN ANY EQUIPMENT WITHOUT PRIOR WRITTEN APPROVAL FROM YOUR DEALER.**
