MUZZLELOADER, RIMFIRE & CENTERFIRE UTILITY RIFLES

# KNIGHT **KP1** UTILITY RIFLES

The Knight KP1 forearm is removed without tools by pulling down on the forearm lever.

The Knight KP1 barrel is detached from the receiver by removing a pin.

The Knight KP1 action breaks open with a simple push of a button.

The Knight KP1 trigger and hammer assembly is removed with the push of a lever.

The Knight KP1 safety lever makes it easy for on/off use.

**ONE GUN.  
SO MANY OPTIONS.**

## **Only one utility gun carries on the tradition that launched an industry—the Knight KP1**

Introducing Knight Rifles' KP1 "utility rifle"—one gun that transforms from muzzleloader to centerfire rifle, to rimfire rifle in the blink of an eye! This all new utility rifle is sold in three rifle configurations: The Whitetail series combination packages in three caliber combinations; the Varmint series combination package, or the Magnum series interchangeable gun system that features 7 caliber options with interchangeable barrels. It's the total package that serious shooters have been waiting for. Knight's KP1 is a culmination of all the qualities that make a Knight a Knight—*quality, accuracy, and reliability*. Now add *versatility*.

The Knight KP1 is the only utility rifle on the market that can go from a centerfire rifle to a rimfire rifle! What's more, the Knight KP1 utility rifle is easier and faster to change out barrel and caliber configurations and to clean because it's completely tool less!\* It only takes seconds to convert from muzzleloader to centerfire to rimfire. Now, you can hunt deer in the morning and squirrels in the afternoon with the same gun!

\* You do need an allen wrench and a screw driver to convert to rimfire. The KP1 does require a combo tool to remove the breech plug.

# KNIGHT **KP1** GUN SYSTEMS

## The most accurate muzzleloader you've come to trust—with a twist!

How does the most accurate and reliable in-line muzzleloader ever made get even better? By taking that same gun, and with the a pull of a lever here and a push of a few buttons, you've easily converted the Knight KP1 muzzleloader into a caliber of your choice. That's how.

The chart on the back of this brochure lists all the KP1 barrel kits available to you in seven additional calibers, two barrel finishes, and three stock configurations.

- Knight KP1 muzzleloaders feature the only 100-yard accuracy guarantee
- Knight's Green Mountain Barrels are among the most accurate barrels available
- Knight quality trigger mechanisms are legendary for a crisp, consistent break
- Stocks available in Next G-1 Camouflage, Black Composite or Sandstone Laminate

# KNIGHT **KP1** COMBINATION PACKAGES

## Knight KP1 combines legendary quality and reliability with unparalleled versatility

The Knight KP1 Varmint series and KP1 Whitetail series combination packages provide you with two interchangeable barrel systems of your choice. The Varmint Series gives you an extremely accurate and powerful rifle in smaller calibers. Each KP1 Whitetail series combination starts out as a legendary Knight in-line muzzleloader, but in the blink of an eye, without need of tools it can be turned into a reliable centerfire rifle with several choices of calibers, barrel finishes and stock finishes.

- The Knight KP1 Whitetail series muzzleloader features a 100-yard accuracy guarantee
- The Knight KP1 Whitetail series combination packages stocks are available in Next G-1 Camouflage or Black Composite

All Knight KP1 rifles feature free floating Green Mountain Barrels, which are among the most accurate barrels available.
