

Three things Knight's competitors don't want you to know:

1. Undeniable Accuracy

Every year, the world's muzzleloading rifle manufacturers square off in a shooting competition that tests accuracy unlike any other event.

For the past *six consecutive years* Knight has blown away the competition! In fact, Knight offers your customers the only accuracy guarantee in the industry.

2. Unquestionable Reliability

The Full Plastic Jacket™ forms a perfect seal to keep out moisture to assure reliable ignition no matter what weather Mother Nature throws at you. No other muzzleloader can make that claim—in fact, in our booth at SHOT, we'll show you this film of our muzzleloader firing after being fully submerged! Seeing is believing.

3. Easiest Loading

What would you prefer to handle while in your tree stand; in the dark; when it's sleeting out, and your fingers are numb? Try it yourself. You'll agree, our Full Plastic Jacket™ is the easiest way to handle a 209 primer.

Your customers deserve the best. You deserve the truth.

Stop by booth #4113 and see for yourself why Knight has been providing the world's best in-line muzzleloader for over 20-years.
