# Instructions for Reaction Cam

THANK YOU for your purchase of the Game Spy Reaction Cam. Please read this sheet before operating the unit. If you have any questions about this product, please contact us using the information on the back of this sheet.

I   GETTING STARTED

The Game Spy Reaction Cam provides the ability to capture, store and review still images and videos.

To use the ReAction Cam, install two AA Alkaline batteries under the Battery Door. Insert an SD card into the SD Card Slot under the rubber flap on the back of the unit. The maximum capacity of the SD card is 16GB.

Secure the Reaction Cam by sliding one of the two provided mounting options onto the Mounting Track. Turn on the Reaction Cam by pressing the ON/OFF Button on the right side of the unit.

TV Out (cable not included)
SD Card Slot (card not included)
Battery Door for 2 AA Alkaline Batteries (not included)
Mounting Track

II   BUTTON OPERATION

CAMERA →   ← VIDEO / Instant Record

DOWN →   MENU ENTER   ← UP

→ MENU/ENTER BUTTON – Displays the available functions including Playback, Standard Features, Advanced Features and Setup. This also is the Enter button for selecting an option.

→ UP BUTTON – Advances to the previous option in the menu or zooms-in when taking a picture or recording a video (2X, 4X, 6X, and 8X).

→ DOWN BUTTON – Advances to the next option in the menu or zooms-out when taking a picture or recording a video (2X, 4X, 6X, and 8X).

→ CAMERA BUTTON – Takes a still picture or multiple still picture if multi-shot

→ VIDEO BUTTON – Starts and stops video recording. Blue light indicates recording in process. Instant Record: If camera is powered OFF, holding the Video Button for a second will turn on the camera and it will immediately begin recording video; however, the LCD display will be turned off (the blue recording light will be blinking indicating you are recording). To save battery life, the LCD will initially dim while recording and then turn off. You can turn on the LCD by pressing any other button.

III MENU

Press the MENU/ENTER button to enter the Main Menu. Use the Up and Down Buttons to move through the options and the MENU/ENTER button to select and a highlighted menu option.

V VIDEO PLAYBACK ON A COMPUTER

The provided mini CD contains a video player that is compatible with the High Definition video files shot using the Reaction Cam. This video player is compatible with PC or Mac systems. To load this video player, simply insert the mini CD into your CD drive. The disk should begin the auto load sequence automatically, just follow the on screen instructions. If the CD does not begin auto installation, simply go to My Computer, and click on your CD ROM drive. Next click on the "Setup.exe" icon and setup will begin. For Mac users click on the file folder "macosx", and then click on the setup file that matches our Mac OS version.
