

Instructions for Scent Boss

THANK YOU for your purchase of the Scent Boss, a top quality Moultrie product. Please read this sheet before activating the unit. To help us to better serve you, please complete and mail the enclosed Warranty Card. Scent Boss includes two replaceable factory installed AAA alkaline batteries that will operate your unit for up to 90 days.

! DO NOT PULL START TAB UNTIL UNIT IS FILLED AND HANGING

I CONFIGURING AND FILLING

CONFIGURING:

Scent Boss is factory configured to dispense in the morning and the evening. To dispense in the morning only, use scissors to cut the **Morning Only Wire** at the bottom of the unit.

FILLING:

Remove **Cap** and carefully pour fluid into the three ounce reservoir using provided **Funnel**. Replace **Cap**. The chart below indicates the approximate number of days the scent will last based on the amount added and the Morning/Evening configuration.

Morning Only Wire -
Cut To Dispense in the
Morning Only

| Amount of Scent in Reservoir | 1oz | 2oz | 3oz |
|-----------------------------------|-----|-----|-----|
| Dispense Morning & Evening - Days | 21 | 42 | 63 |
| Dispense Morning Only - Days | 42 | 84 | 126 |

II HANGING AND ACTIVATING

HANGING:

Scent Boss can be hung from a tree branch using the lanyard which is attached to the top of the unit.

ACTIVATING:

To activate the unit, pull the **Start Tab** on the bottom of the unit. If Scent Boss does not immediately run one cycle when the pull tab is removed, remove and replace battery door. From this point forward, Scent Boss will automatically run based on the **CONFIGURATION** setting. Scent Boss will ignore all changes in light for seven hours after each run and may not operate correctly in temperatures below 32 degrees Fahrenheit.

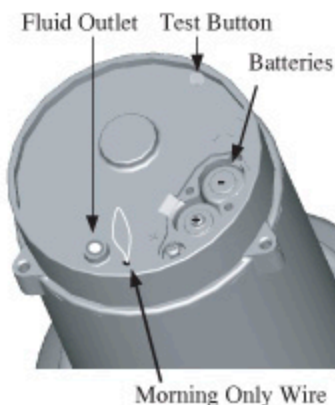

III TESTING AND REPLACING BATTERIES

TESTING:

With hand clear of **Fluid Outlet**, press and hold **Test Button** for three seconds to run a test cycle.

REPLACING BATTERIES:

Use a Phillips head screwdriver to remove battery door and take out the two AAA Alkaline **Batteries**. Install new **Batteries** as shown. Replace door and tighten screw. Alkaline batteries will last approximately 90 days.

Morning Only Wire

IV CLEANING BEFORE STORING

Remove all scent and thoroughly flush reservoir with water. Fill reservoir with water and run test cycle to clean pump. Remove water and run an additional test cycle. Let unit dry completely before storing.
