HUNTERS HAVE HEROES. THE POWDER-COATED EXTRUDED ALUMINUM TYPE.

ALL WHO ENTER THESE WOODS - DO SO WITH REVERENCE. YOU ARE IN A SPECIAL PLACE.

YOU ARE CONTINUING A TRADITION THAT STRETCHES BACK AS FAR AS TIME. TO SUCCEED HERE

IS TO HAVE DEMONSTRATED MASTERY OF ANCIENT SKILLS. TO HAVE REFINED YOUR EQUIPMENT

TO ITS HIGHEST LEVEL. THESE ARE THE THINGS THAT GUIDE US AT SUMMIT TREESTANDS.

WE DON'T JUST BUILD HUNTING STANDS AND BLINDS. WE FACILITATE THE SUCCESSFUL PURSUIT OF

THE MOST ANCIENT HUMAN SPORT AS IF OUR LIVES DEPENDED ON IT. BECAUSE AT ONE TIME IT DID.

EVERY SUMMIT STAND, BLIND, HARNESS, ACCESSORY - IS BUILT TO THAT MOST SERIOUS PURPOSE.

CLIMBING STANDS 6-11 HANG-ON STANDS12-15 LADDER STANDS16-19 SAFETY HARNESSES ...28-31 RUN-N-GUN BLINDS.....33-34 LAYOUT BLINDS.......35-36

>> SUMMIT 2009

THE ONLY THING BETTER THAN A LIFE SPENT IN THE WOODS IS

SOME TIME SPENT IN R&D BEFOREHAND.

ANYONE WHO STEPS FROM THE TRODDEN PATHS OF CIVILIZATION INTO THE GREAT WILD IS A LUCKY INDIVIDUAL. WHEN YOU DO SO TO ENACT YOUR RIGHTFUL PLACE IN THE FOOD CHAIN, SO MUCH THE BETTER. BUT THIS STEP REQUIRES PREPARATION. EXPERTISE AND KNOWLEDGE, AS WELL. FORTUNATELY THIS IS WHAT YOU GET WHEN A PASSIONATE HUNTER, WHO ALSO HAPPENS TO BE A TRAINED ENGINEER, SETS OUT TO MAKE TREESTANDS. THIS IS WHAT YOU GET EVER SINCE JOHN WOLLER SR. STARTED SUMMIT TREESTANDS IN 1981.

THE COMBINATION OF HUNTING PASSION AND ENGINEERING EXPERTISE GOES A LONG WAY IN EXPLAINING WHY SUMMIT HAS LEAD THE WAY IN DEVELOPING STANDS THAT ARE SECURE, COMFORTABLE, SILENT AND CONCEALED. PROOF IS EVIDENT IN OVER A DOZEN SUMMIT PATENTS, NOT TO MENTION COUNTLESS INNOVATIONS YOU NOW FIND THROUGHOUT THE INDUSTRY – PADDED SEATS, BARS AND GUN RESTS, NOISELESS PLASTIC BUSHINGS, KNOBS INSTEAD OF WING-NUTS, WELDED BACK BAR BOLTS – THE LIST GOES ON. IT'S THE SAME COMBINATION THAT KEEPS SO MUCH OF THE MANUFACTURING OF SUMMIT TREESTANDS IN DECATUR, ALABAMA WHILE OTHERS MOVE THEIR OUTFITS OFFSHORE. AND IT'S WHY SUMMIT STANDS ARE BACKED BY THE BEST WARRANTY IN THE BUSINESS. IT'S WHAT MAKES A SUMMIT – WELL, A SUMMIT.

A MESSAGE FROM JOHN WOLLER SR.

When I first started making climbing stands in my garage over thirty years ago, I never dreamed Summit would grow to become the industry leader in treestand design and engineering. Safety, Comfort, Silence and Concealed – they've been the guiding principles of product development at Summit since I founded the company in 1981, and we've worked hard to apply them to all of our new products for 2009.

I'm particularly excited about our all-new Raptor Series hang-on stands with the Talon Bracket System – which makes hanging a stand every morning fast and easy. Our new outfitter-quality ladder stands will set a new standard for stability and durability, too. And, I'm especially pleased with our new line of ground blinds, which are a logical extension of our treestand business. The new Run-N-Gun blinds look great in the new digital FLX camo, and they set up so fast that you may wonder what you did before they came along. Our new layout blinds for waterfowl hunting actually make lying in a muddy cornfield comfortable, and the new digital FLX-OT will attract everyone's attention except the geese and ducks.

So, here's to some good hunting in 2009. Just please remember to wear your safety harness so you'll be hunting again the next season, too. – John Woller Sr., Founder

< JOHN WOLLER SR. – Founder

>> SUMMIT 2009

THESE ARE YOUR WOODS. YOU DON'T NEED A GUIDE. JUST A LITTLE POWDER-COATED ALUMINUM SUPPORT, THAT'S ALL.

EVERY TREE. EVERY ROCK. EACH PINECONE AND TWIG IS ETCHED IN YOUR MIND. WHEN A DEER ENTERS THESE WOODS – YOU KNOW IT. WHEN A BUCK SO MUCH AS PASSES GAS IN THIS ACREAGE – YOU KNOW IT. SO WHEN IT'S TIME FOR ACTION, YOU WANT A CLIMBING TREESTAND AS COMFORTABLE IN THESE WOODS AS YOU ARE. EVERY SUMMIT CLIMBING STAND IS THE DIRECT BENEFICIARY OF A 25-YEAR STAND-BUILDING TRADITION. THE RESULT OF A QUARTER CENTURY OF THE MOST INNOVATIVE DESIGN FEATURES AND MANUFACTURING TECHNIQUES ON THE MARKET. YES. THESE ARE YOUR WOODS. THIS IS YOUR HOUSE.

CUICK DRAW™

summi]okt

ENGINEERED TO PERFECTION. BUILT TO LAST.

Our climbing stands have set the pace for the treestand industry since 1981, with more patents and innovations than all of the other manufacturers put together. Actually, most of our competitors aren't manufacturers – they're importers. That's because Summit is the only major brand of climbing treestands still assembled in the U.S.A. – by hard-core American hunters.

But there's a lot more to Summit's claim to leadership than patents and pedigree. Our precision-welded extruded aluminum SummitLokt™ construction provides exceptional rigidity and strength without adding extra weight − while eliminating any creaks and clicks for absolute silence in the field. The aluminum is powder coated with a non-glare finish for durability and concealment.

Our extra-strong, rubber-coated snakeable cables feature QuickDraw™ triggers and slide easily into the frame to quickly adjust to fit trees from 8" to 20." No pins, knobs or bolts to work loose, lose or make noise. Our RapidClimb™ Stirrups are quick and easy to use – while eliminating the need for straps. Our padded closed-cell foam seat will keep you warm and comfortable all-day – and is easily adjustable for a perfect fit. And the unique, padded armrests and extra-high seatback eliminate fatigue in your neck and shoulders.

SUPERB CONSTRUCTION – Quality-built in the U.S.A. and inspected for quality at every step in the construction process, we stand behind our stands with our Limited 5-Year Warranty.

CLIVIBING STANDS

SUMMIT TITAN

MODEL 81087

The Titan is our largest climbing treestand with more room than any we've ever built before. With a wider climbing width and length and way more platform space, the Titan will accommodate the biggest hunter - or anyone who wants some extra room. The comfortable padded seat easily adjusts up and down for bow and gun hunting, and the multi-purpose solid front bar not only makes climbing easier, but serves as a gun rest.

Weight limit: 350 lbs. Overall weight: 25 lbs.

SUMMIT **GOLIATH SS**

MODEL

The Goliath SS is a full-featured climber for full-framed hunters. Extra room and an ample 350 lb. limit makes it the perfect stand for the bigger hunter or for anyone looking for a little extra room. A solid front bar makes climbing easy and works well as a gun rest, and thick padding on the armrests and seat make sure you stay comfortable all day.

Weight limit: 350 lbs. Overall weight: 21 lbs.

CUICK DRAW™

RAPIDCLIMB"

summi]okt

ULTIMATE VIPER SS

MODEL 81072

Simply the ultimate, tricked-out luxury climbing stand. It's a fully accessorized Viper™ SS featuring our incredibly comfortable Surround Seat (also available as an accessory to upgrade your current Summit stand) and a super-thick padded Comfort Mat which takes the back pain out of prolonged standing. With a fully adjustable gun rest, armrest padding throughout and a total camouflage package – including a free drop blind – you'll be hunting in comfort and stealth.

Weight limit: 300 lbs. Overall weight: 26 lbs. with accessories.

RAPIDCUMB"

summi]okt

VIPER SS

MODEL 81066

Our lightest sit-and-climb stand, the Viper™ SS is our best all-round climber, with a perfect balance of roominess, comfort, features and light weight. The versatile padded seat can be raised for bow hunting and lowered for hunting with a gun – and the solid front bar makes climbing easy and works well as a gun rest. Like all Summit climbers, Viper™ SS features our RapidClimb™ Stirrups, QuickDraw™ and SummitLokt™ technologies.

Weight limit: 300 lbs. Overall weight: 20 lbs.

CUICK DRAW™

IMBING STANDS

STAND YOUR GROUND

180°MAX SS

81073

The 180° Max SS offers a bit more room and capacity for bigger hunters and those who just prefer some extra space. The height-adjustable Surround Seat lets you sit facing the tree or can be reversed with the seat against the tree. The premium-quality precision-welded aluminum extended-top frame is ideal for tall hunters, yet still keeps the weight down to a manageable 22 lbs.

Weight limit: 350 lbs. Overall weight: 22 lbs.

CUICK DRAW™

Summit's QuickDraw™ cable retention system is an important innovation in climbing treestands. It's also the fastest and quietest cable attachment system ever invented. Once the cable is sized for the tree diameter, all you have to do is insert the cable into the QuickDraw bracket of the suspension arm, pull the "trigger" and the cable securely locks into place. Simple. There's no fumbling with pins, knobs, nuts or bolts - and the attachment is absolutely secure and silent. Who would hunt without it? Not us.

RapidClimb™ Climbing Stirrups are ergonomically shaped and adjustable to fit any boot. Fast and incredibly easy to use, they are offered as a standard feature on all Summit climbing stands.

summi okt

SUMMITLOKT™ CONSTRUCTION

We use high-quality extruded aluminum and SummitLokt™ with precision welds for absolute rigidity and maximum strength. Every joint is "locked" into place before welding and each joint is designed so the stress on the weld is minimized. The result is a noise-free stand that is strong, safe and secure. SummitLokt is featured on all of our climbing stands and most of our non-climbers.

OPEN FRONT CIVISING STAND YOUR GROUND STAND YOUR GROUND

RAZOR SS

MODEL 81068

The Razor™ provides all of the clearance of an open front stand with the climbing ease of a sit-and-stand climber. The unique folding bar allows you to sit and climb to your preferred hunting elevation – and then fold it out of the way while you hunt. The comfortable padded seat is easily removed or adjusted for height – and the spacious platform is the same size as the Viper™ SS and Goliath™ SS.

Weight limit: up to 300 lbs. Overall weight: 21 lbs.

summi okt

OPENSHOT DELUXE

MODEL 81079

Designed for hunters who like to pack it back into the deepest woods, the OpenShot^{**} Deluxe weighs a scant 15 pounds. And, for a compact, ultra-portable stand, it feels plenty comfortable and roomy when you settle down to hunt. A unique folding seat is set inside the seat frame and easily folds up when you want to stand up against the tree. The padded seat then becomes a cushion for your back, allowing you to stand more comfortably for longer periods of time and with plenty of room.

Weight limit: up to 300 lbs. Overall weight: 15 lbs.

>>>> CLIMBING STANDS

DEER DON'T STAY IN THE SAME PLACE ALL DAY. PERHAPS, NEITHER SHOULD YOU.

SILENT GHOSTS IN THE WOODS. HERE. THEN GONE. MOVEMENTS DRIVEN BY NATURE. OR THE BOZO THAT JUST CAME THROUGH THE WOODS ABOUT AN HOUR AGO. FEAR NOT, FOR THE ALL-NEW RAPTOR SERIES OF HANG-ON STANDS OFFERS EVERY OUNCE OF RELIABILITY AND EASE OF USE THAT DISTINGUISHES A SUMMIT STAND – BUT IN A HIGHLY MOBILE CONFIGURATION. BUILT TO EXCEL IN EVERY LOCATION AND SITUATION YOU MIGHT ENCOUNTER IN THE PURSUIT OF WHITETAILS, YOU WON'T FIND A MORE SECURE, COMFORTABLE, SILENT AND DEPENDABLE STAND IN THE WOODS. OF COURSE, WHEN WE'RE TALKING ABOUT THESE STANDS, THEY'RE PRETTY HARD TO FIND IN THE WOODS TO BEGIN WITH.

RAPTOR SERIES WITH TALON BRACKET SYSTEM

DESIGNED BY ENGINEERS. AND HUNTERS.

If you think all hang-on treestands look and function pretty much alike, you haven't seen the new Raptor Series featuring Summit's innovative Talon Quick-Attach Bracket System. Once you strap the compact bracket to a tree, you can install or remove the stand in less than 30-seconds. Easy, quiet and foolproof – especially in the dark, the Talon System allows you to remove your stand from the tree every night to prevent theft or to comply with hunting regulations – without the hassle of re-hanging the bracket every morning. (Additional Talon brackets are available separately.)

All of the Raptor Series hang-on stands feature our Single Cable Spreader design. Meaning the platform is supported by a single, self-leveling cable with a unique spreader bar below the seat. A seemingly simple feature that significantly increases the useable space on the platform by eliminating the constricting "V" formed by traditional 2-cable suspension systems. The leveling cable system makes it incredibly easy to make precise adjustments to the platform, too.

>>>> HANG-ON STANDS

HANG-ON STANDS

STAND YOUR GROUND

summi]okt

EVERY JOINT IS LOCKED INTO PLACE BEFORE WELDING, AND DESIGNED TO MINIMIZE STRESS ON EACH WELD.

RSFALCON

MODEL 82042

Light, compact and comfortable, the rsFALCON will hang in less than 30 seconds using Summit's innovative, new Talon Bracket System. Built of precision-welded aluminum using ultra-quiet SummitLokt" construction, the Falcon features Summit's Single Cable Spreader that eliminates the space-restricting "V" formed by 2-cable suspension systems. It's simply the most sophisticated hang-on stand ever designed and built.

The innovative Talon Bracket System quickly straps to the tree to provide a strong, durable hook which holds your treestand solidly against the tree – yet takes only seconds to hang and remove.

Summit's leveling platform is safe and secure. Height and attitude adjustments can be made quickly by moving one or both locking clips up or down a notch. Then, the single cable slides through the spreader bar to automatically level the platform.

RSHAWK

MODEL 82043

Identical to our rsFALCON, but with a 4" longer platform for just enough extra room. Designed for easy, silent hanging, even in the dark, using our new Talon Bracket System. The exclusive Single Cable Spreader significantly increases the useable space of the platform and allows you to stand with your back to the tree. The flip-up padded seat switches quickly from a sitting to standing position.

Both rsFALCON and rsHAWK stands feature an extra-thick padded seat that quickly flips up and out of the way to make it easy to stand with your back to the tree. It makes a comfortable back pad, too.

All Raptor Series Hang-On Stands are engineered, designed and built in Decatur, Alabama and backed by Summit's 5-Year Limited Warranty.

RSEAGLE

MODEL 82044

The world's most comfortable hang-on stand features Summit's new adjustable saddle-style seat which has 3" of padding and is suspended to relieve pressure points for incredible comfort during the longest hunts. The seat also flips up and adjusts for height. The rsEAGLE also hangs easily using our Talon Bracket System - and our Single Cable Spreader maximizes space on the rsEAGLE's extra-large platform. It's simply the ultimate in comfort and convenience.

The innovative Single Cable Spreader bar increases the usable space of your platform by eliminating the constricting "V" of two-cable systems. With plenty of room, you can stand with your back to the tree - not sideways - and move around without fear of tripping.

Summit's ultra-comfortable saddlestyle seat also flips up to become a padded back pad for stand-up hunting. The built-in "quick clip" secures the seat to the back pad.

STEEL TANDS STAND YOUR GROUND

Featuring rugged steel construction, the rsOSPREY offers most of the advantages of the Raptor series aluminum hang-on stands at a lower retail price. The padded, flip-up seat and unique Single Cable Spreader makes standing with your back to the tree safe, comfortable and convenient. And, the exclusive Talon Bracket System makes hanging and removal a snap.

The steel version also uses a Talon bracket for fast, safe and reliable hanging and removal of the stand.

Summit's leveling platform is safe and secure. Height and attitude adjustments can be made quickly by moving one or both locking clips up or down a notch. Then, the single cable slides through the spreader bar to automatically level the platform.

summi lokt EVERY JOINT IS LOCKED INTO PLACE BEFORE WELDING, AND DESIGNED TO MINIMIZE STRESS ON EACH WELD.

82041

>>>> HANG-ON STANDS

THE WOODS ARE YOUR CHURCH. NOW ALL YOU NEED IS A WORTHY PULPIT.

DEVOTION. HUMILITY. PURITY OF HEART. SACRIFICE. LISTEN TO THE GOOD WORD, FRIENDS. OF COURSE, WHEN YOU DELIVER
YOUR SERMON FROM THE FORMIDABLE MOUNT OF A NEW SUMMIT LADDER STAND, THE WORD IS SOLID, STEADFAST AND
COMFORTABLE. AVAILABLE IN ONE, ONE-AND-A-HALF AND TWO PERSON CONFIGURATIONS, THEY ARE AS ROCK-SOLID AS
ANY STAND IN ALL CREATION. EACH ONE SERIOUSLY OVER-ENGINEERED TO WITHSTAND EONS OF DEVOTED USE.
EACH ONE AFFORDING THE COMFORT TO HUNT ALL DAY WITHOUT CONSTRAINT. EACH ONE VERY MUCH A SUMMIT. AMEN.

NO OTHER LADDER STAND COMES CLOSE.

Did you ever think about the "wobble factor" when shopping for ladder stands? It seems like the lower the price, the higher the wobble factor – which you only discover after you've lugged your new stand home from the store, hauled it out into the woods and mounted it to a tree. Nice.

In addition to low price, another clue that should raise an eyebrow, is the "stabilizer bar." You can pretty much figure that any stand that needs a stabilizer bar isn't going to be very stable. Especially on cold, dark mornings before the coffee kicks in.

Enter the new Summit ladder stands. They don't need stabilizer bars because our ladders are built with extra-heavy-duty thick-gauged welded steel, with wide rungs and sturdy rails. The result is a rock-solid hunting platform that won't wobble when you're climbing up or down – or when the wind picks up. When you're hunting out of a Summit ladder stand, the only wobble you'll ever feel will be in your knees when that 10-point toad you scouted all summer suddenly saunters into view.

>>>>> LA

>>>> LADDER STANDS

LADDER STANDS

STAND YOUR GROUND

SINGLE SHOT

MODEL 82046

The most stable, most durable ladder stand on the market today. Over-built with extra-heavy-duty thick-gauge steel, with wide, welded rungs and sturdy hand rails, the Single Shot is so solid that it does not need a stabilizer bar to prevent ladder and platform wobble. With extra-thick padded seats and a spacious platform, you won't find a more rock-solid, safer ladder stand anywhere.

Thick, padded seat and armrests are designed to be ultra-comfortable for extended periods of time. All of the new ladder stands are offered in Next $^{\infty}$ G1 $^{\infty}$ camo pattern.

SINGLE SHOT MAGNUM

MODEL 82047

With all the quality features of the Single Shot, the Single Shot Magnum offers 50% more room for larger framed hunters – or those who just want some extra room to move around. Same thick-gauge welded steel construction. Same wide, welded rungs and sturdy rails. Same ultra-stable, ultra-safe design. But, with a wider padded seat and platform.

The one-and-a-half person model is a great concept for those who like a little extra room to move around and shift positions. The thick, padded seat and armrests make this a one-man seating suite.

DOUBLE BARREL

MODEL 82049

When hunting with a friend or loved one, you sure don't want to take chances in a flimsy, bargain-priced stand from who-knows-where. The all-new Double Barrel is built from the same quality materials and to the same standards as every Summit ladder stand – but in a two-person seating version. Safe. Secure. Comfortable. For two.

Super-wide, bench-style seating with thick 2" padding is designed to comfortably support two hunters for extended periods of time.

>>>> LADDER STANDS

X-POD MODEL 82027

It gives you an elevated view in areas where putting up a hang-on or locating a good climbing tree is just not in the cards. In addition to the included ratchet tie-off straps and anchors, we also have flared the rear legs for a wider, more versatile base. Put it right where you want it every time – without compromise.

Summit Pods are overbuilt for comfort, stability and safety – and engineered to stand up to a lifetime of hard use. Unlike so many tripod style stands, which are built to sell at the lowest possible price, Summit Pods are built to outfitter-quality standards for rock-solid stability and many years of hard use.

Each Pod is made from extra-heavy-duty thick-gauged welded steel, with wide rungs and sturdy rails resulting in exceptionally stable platforms. The roomy platforms feature a thickly padded seat with ergonomically designed padded backrests.

Like our new line of sturdy, premium-quality ladder stands, our free-standing Pods were developed for hunters who want quality and long-term value – not the cheapest price.

DOUBLE X-POD

MODEL 82037

A two-person stand-alone platform with all the features needed for an all-day hunt. The Double X-Pod lets you bring someone along to call, rattle or video without setting up another stand. Two full seats are easily adjusted independently and the padded, fully adjustable gun rest is accessible from either seat.

The Double X-Pod features twin adjustable seats for customizable comfort for each hunter. Both seats are suspended to reduce pressure points, feature high-backed padded backrests, and are infinitely adjustable to meet the needs of any size hunter.

PREDATOR POD

MODEL 82028

Solid climbing steps on one leg with footrest steps on all the legs means the shot is yours from nearly any angle. The swiveling seat and pivoting gunrest allow you to get into the stand quickly – and move silently into position. Its wide tripod stance is super stable and there is plenty of clearance underneath for versatility in the woods.

Designed especially for predator hunting, the Predator Pod features a swivel seat and pivoting gun rest that allows you to silently line up your shot and shoot with consistent, pin-point accuracy.

>>>>> PODS

CLIVIBING STEPS.....

BUCKSTEPS

MODEL 82008

More than likely, you've heard somebody talking about Bucksteps. Since their introduction, they've become a hunting staple in the woods. Big enough to get both boots on for hanging stands, but small enough not to be noticed, Bucksteps set you up to choose the best location, not the easiest.

BuckSteps provide safe, slip-proof footing, even when wearing muddy or snow-caked boots. They're designed to compactly nest together for easy packing in and out of the woods.

SWIFTREE"

MODEL 82001

Ever felt uneasy about climbing screw-in steps? So did we until SwifTree. The unique enclosed steps provide sure footing and help prevent your boot from slipping off the side. Even in total darkness you can "feel" the correct place to step.

The unique enclosed steps "capture" your foot to eliminate the possibility of your boot slipping off the end of the step – providing safe, secure footing for even muddy or snow-caked boots.

>>>> CLIMBING STEPS

TROPHY CHAIR

STAND YOUR GROUND

MODEL 82023

This simple seat will open up a whole new way to hunt deer, turkeys, and lots of other stuff, too. The possibilities are unlimited. Just sling the buckle around the tree and hang it. No more squirming around on pickle buckets, stumps or rocks. Also great for ducks in flooded timber.

>>>>> TROPHY CHAIR

GUN & BOW ACCESSORIES

ADJUSTABLE GUN REST | 85115
Fully adjustable gun rest fits most of our aluminum climbing treestands. It includes a padded front bar with NEXT G1 Camo.

UNIVERSAL BOW HOLDER | 85091
Our all metal, universal bow holder is the perfect stand addition for bowhunters.
It clamps on in seconds and fits most Summit models plus many commercially available stands.

ADJUSTABLE GUN
REST FOR GOLIATH, TITAN
or 180 MAX | 85129
Fully adjustable gun rest fits
Goliath, Titan and 180° Max only.
It includes a padded front bar
with NEXT G1 Camo.

GUN REST | 85007 Pivoting gun rest for use on all Summit stands that have a permanent front bar. Also works on many commercially available stands. Complete assembly.

PLATFORM ACCESSORIES

FOOTREST KIT FOR ALUMINUM NON-FOLDING TREE STANDS | 85023

Platform channels must be closedshape that run side to side, not front to back. Eliminates pressure on back of your legs. Also fits 2004 and newer Backpacker model stands. Easy to install.

RAPID CLIMB STIRRUPS | 85052

Eliminate your toe straps.
Just rest your heel on the bungee,
stretch it back and insert your foot
in the stirrup. Stirrups will fit any
of our aluminum stands with 1"
square tubing. They also fit many
commercially available stands.

HIGH TRACTION STRIPS | 85002

Set of 5 (five) adhesive backed, non-skid strips. Very easy to apply and will fit all of the Summit models.

FOOTSTRAP KIT FOR ALUMINUM STANDS | 85026

Fits aluminum models only. Does not fit 2004 or newer platforms.

>>>>> WITH SUMMIT ACCESSORIES

YOU CAN MAKE A STAND PRETTY COMFORTABLE,

BUT ALL REFERENCES TO LAY-Z-BOY END THE MOMENT YOU START FIELD DRESSING.

UTILITY ACCESSORIES

EZ KUT PRUNER | 85119
The ratchet design cuts up to 1"
diameter live branches. Great for
dressing game, clearing camp sites,
opening up shooting lanes or just
working around the house. Includes
a metal hand guard, cushioned grip
and thumb lock for when they are
not in use.

UTILITY STRAPS WITH TOURNIQUET BUCKLE | 85024

Our multi-purpose utility strap will come in handy in many situations. This is the same strap that is included with all our treestands. Sold in pairs.

30' BOW ROPE | 85030 Works great for hoisting your gun or bow. Easy to attach, tangle-free design.

SEATING ACCESSORIES

FOAM SEAT FOR CLIMBING TREESTANDS | 85124

Fits most model Summit climbing treestands including: Viper, Goliath, Razor, Bullet, Python and Razor. Also fits many commercially available stands. NEXT G1 Camo.

SURROUND SEAT | 85117

Offers full coverage enclosed seat and convenient pockets within easy reach. NEXT G1 Camo. Fits most Summit climbing treestand models.

FOAM SEAT FOR: 180, SINGLE BARREL OR X-POD | 85071

Hard, single piece backrest, Quick change buckles. NEXT G1 Camo.

FOAM SEAT FOR OPENSHOT | 85070

Fits all OpenShot treestands made between 2004 and 2007.

TREESTAND ACCESSORIES >> >>>>>>

MAKE YOUR STAND THE PERFECT PERCH WITH THE SUPPLIES YOU NEED FOR THE ULTIMATE IN HUNTING SAFETY, COMFORT AND CONVENIENCE. SEATS, BOW HOLDERS, FOOT RESTS AND GUN RESTS ARE ESSENTIAL ACCESSORIES FOR STAYING COMFORTABLE DURING THOSE LONG STRETCHES IN THE HUNTING STAND. YOU CAN ALSO UPGRADE YOUR TREESTAND WITH CAMO SKINS, TRACTION STRIPS AND BACKPACK STRAPS. AND IF YOU'RE PLANNING ON TAKING SNACKS, HEAT PACKS OR BINOCULARS ON YOUR HUNT, YOU'LL WANT TO MAKE SURE TO PICK UP SOME OF OUR ZIPPERED STORAGE BAGS. THEY EASILY SNAP ONTO YOUR STAND WITHOUT INTERFERING – AND THEY GIVE YOU PLENTY OF EXTRA STORAGE ROOM FOR YOUR HUNTING GEAR.

BACKPACK STRAPS

DELUXE BACKPACK STRAPS | 85057 Upgrade to these thick padded straps. Adjustable and easy to install. Fits many other commercially available stands.

ADJUSTABLE
BACKPACK
STRAPS | 85005
A set of camo backpack straps
for use with any of our Summit
stands. Quick-adjust buckle.
Fits many other commercially
available stands.

PADS AND BAGS

72" PAD KIT | 85121 Single 72" pad with cable ties for most Summit stands. Also fits many commercially available stands.

UNIVERSAL ARM
PAD KIT | 85120
Pair of 12" camo arm pads with cable ties. NEXT G1 Camo.

FRONT STORAGE BAG | 85122 Zippered storage bag for our hunting stands. Our front storage bag will fit any Summit that has a front bar, and they also fit many other brands of treestands.

SIDE STORAGE BAGS | 85123 Two zippered storage bags for your hunting stands. Bags are tapered to fit neatly under the armrests on all Summit stands. They also fit many other brands of treestands on the market.

REPLACEMENT PARTS >>>>>>

DELUXE CUSTOMIZATION

>>>>>>>>>>>

COMFORT MAT | 85118 Made with comfortable highdensity foam that won't hold water. Reduces the stress on your feet and back. NEXT G1 Camo.

DROP BLIND | 85116 Easy to deploy and then rolls up to stow around the top bar of many of our closed-front stands. NEXT G1 Camo.

LADDER STRAP KIT | 85074 Replacement ratcheting straps for Summit ladder stands. Includes two extra-long straps and two ratchets.

REPLACEMENT SHRINK TUBE FOR CABLES | 85010 Two full-length shrink tubing pieces to replace old, wornout tubing. Heat with heat gun to apply. Sold in pairs.

REPLACEMENT
CABLES FOR CLIMBING
TREESTANDS | 85009
Instead of trying to repair nicks
or cuts, purchase a brand new
pair of cables for your climbing
treestand. Sold in pairs. Fits all
Summit climbing cable stands.

BUCKSTEP REPLACEMENT STRAPS | 85048 Set of replacement straps for the BuckStep tree steps. Adjustable with spring-loaded buckle. Sold in sets of four.*

IN-LINE CABLE TIES | 85051 Great for adding camouflage to your treestand, ground blind, duck blind, etc. The in-line design eliminates scrapes from trimmed off ends. Set of eight.

SAFETY HARMESSES

We think the most important piece of hunting equipment you can take into the woods is a safety harness that's certified to meet the TMA standards for harnesses / treestands. That's why we've devoted as much of our engineering expertise to developing our Seat-O-The-Pants line of safety harnesses as we have to developing treestands. Once again, our design principles of Safety, Comfort, Silence and Concealment guided the development of these must-have safety products.

SAFETY: Seat-0-The-Pants harnesses are safe because their tangle-free design makes them easy to put on – even in the dark – so hunters are more likely to use them. With a four-point full-body design that's completely adjustable for a secure, comfortable fit, the leg straps are configured to prevent groin injury in the event of a fall. Each safety harness includes a lineman-style climbing rope and prussic hitch that helps to maintain continuous contact with the tree to protect you from falls as you climb.

COMFORT: All Summit treestand safety harnesses are lightweight, durable and won't interfere with your shooting. Convenient slides make it easy to adjust every strap for a perfect fit so they never bind or pull or otherwise feel uncomfortable or impede your movements.

SILENT: All metal components (d-rings, leg buckles) are rubber coated so they're 100% silent in the woods.

CONCEALED: Seat-0-The-Pants safety harnesses feature NEXT G1 – NEXT Camouflage's super-realistic woodland pattern.

ROPE SYSTEM

Summit's Treestand Safety Rope
Climbing System is another
innovative breakthrough in
treestand convenience and safety.

The strong, 30' braided nylon climbing rope features a pre-attached prussic hitch, which clips to your safety harness tether. The prussic hitch can then be slid up the rope while you climb to your stand, or slid back down as you descend – yet it will clinch tight in the event of a slip or a fall. This system adds an important safety component to your hunt during those critical periods when you are not seated or standing safely in your stand. The oversized rope, clip and carabineer are also easy to use when wearing gloves.

FASTBACK

The FastBack™ treestand safety harness has a light-weight, tangle-free design that will keep you cool and comfortable. It has all of the fall protection features you need but without added bulk or uncomfortable straps. You can move freely while wearing the FastBack, and the lightweight fabric back keeps you cool. Like all of our treestand harnesses, the FastBack can be worn over or under your standard hunting clothes, so you can put it on before you leave camp. Leg and waist buckle design allows for quick and positive hook-ups. Rubbercoated D-rings allow use as a lineman-style climbing belt. Finally, the tether strap includes "breakaways" designed to absorb the shock of a fall. Comes with a free safety rope and prussic knot.

FASTBACK DELUXE

83061 83062

The FastBack™ Deluxe has all of the safety and convenience features of our FastBack, including a lightweight, tangle-free design, "breakaway" tether strap. Deluxe features include a wider belt design, mesh back for hot weather comfort and two handy side pouches to carry hunting essentials like calls, scents and other small items. Like all Summit harnesses, the Fastback deluxe comes with a free safety rope and prussic knot.

>>> SAFETY HARNESSES

SAFETY HARNESSES

FEATURES TO LOOK FOR IN A NEW SAFETY HARNESS

There's a lot of thought and engineering that goes into a good treestand safety harness, and the best subscribe to the time-proven KISS (keep it simple, stupid) principle. At Summit, we try to make everything as simple as possible – but never T00 simple. And that especially goes for our Seat-0-The-Pants Safety Harnesses.

- 1. TANGLE-FREE DESIGN: A safety harness doesn't do you any good if you aren't wearing it, which is why we pioneered tangle-free designs with our SOP harnesses so they'd be easy to put on and take off. Our standard SOP harness features a handy fanny pack to store your straps when you aren't wearing the harness. With our FastBack harnesses, all you have to do is pick them up by the tether, and the harness is ready to slip on just like a vest.
- 2. LIGHTWEIGHT & COMFORTABLE: Vest-style harnesses look easy to put on and take off, but that's often the best part about them. Many are heavy, hot, bulky and uncomfortable to wear especially over a couple of layers of fleece and an outer shell. SOP harnesses are almost weightless, and once they're on, you almost forget they are there. SOP harnesses are also designed to be worn either over or underneath your hunting garments a handy feature for cold-weather hunting when you want to rig up back in camp.
- 3. SAFETY: That's why you wear them, right? Our SOP harnesses quickly and easily adjust for a perfect fit so there's no binding or pinching, which is especially important if you fall. Plus, our tether straps feature sewn-in break-away pleats which pop open to lessen the shock of a serious fall, so you stay awake and alert.

S.O.P. HARNESS

Simply the lightest, most comfortable, easy-to-use four-point safety harness on the market today. The original tangle-free design, the SOP features a convenient fanny pack to store all your straps when hiking in or out. Or, you can wear it under your hunting clothes so you can rig up before you leave camp. The webbing is light-weight, 6,000 lbs. strength polyester in NEXT G1 camo, and the low-profile interlocking buckles are coated for absolute silence. A break-away tether cushions accidental falls. Comes with a free safety rope and prussic knot.

S.O.P. LOCKING CLIP | 83011 This rugged locking mountaineering-style carabineer is easy to operate while wearing gloves.

S.O.P. SAFETY ROPE WITH HARDWARE | 83015 A complete safety kit with climbing rope, prussic hitch, lineman's clip and locking carabineer clip.

S.O.P. CLIMBING SYSTEM | 83014 Comes complete with 30' climbing rope, prussic hitch, lineman's clip and locking carabineer clip – plus a convenient carrying bag.

S.O.P. TREE DESCENDER | 83018 In the unlikely event of a fall, our Tree Descender will make it easier to get you safely to the ground. Includes safety rope and two prussic knots for foot holds.

SAFETY HARNESS SEAT-O-THE-PANTS ACCESSORIES

S.O.P. CLIMBING SYSTEM | 83024 Combo Pack The combo pack features three complete climbing systems (without carry bags).

S.O.P. SUSPENSION RELIEF SYSTEM | 83049 Comes in a handy carrying pouch. Helps relieve pressure on your legs in the event of a fall.

S.O.P. SAFETY ROPE | 83023 An extra safety rope with prussic knot – but not the accompanying hardware.

SOME PEOPLE'S IDEA OF A SECOND HOME IS A LITTLE MORE DOWN TO EARTH. AS WELL IT SHOULD BE.

THE REWARDS OF A LIFE SPENT IN THE OUTDOORS MAY NOT BE THE SUBJECT OF MANY FORBES MAGAZINE ARTICLES. ITS REWARDS

ARE MORE SUBTLE THAN MEMBERSHIP IN A GATED COMMUNITY. INSTEAD THERE IS THE GRATIFICATION OF MAKING YOUR WAY

THROUGH THE DARK WOODS, QUICKLY SETTING UP A BLIND AND ABSORBING THE WAKING WOODS. SUMMIT GROUND BLINDS ARE A

REWARD UNTO THEMSELVES. THEY ARE, AFTER ALL, SUMMIT BLINDS. HELD TO THE SAME STANDARDS AS ALL SUMMIT PRODUCTS.

YOU ARE FREE TO BE A SINGLE-MINDED HUNTING MACHINE, BECAUSE QUITE FRANKLY, WE'VE THOUGHT OF EVERYTHING ELSE WHEN IT COMES TO YOUR BLIND.

It seemed only natural for us to apply our engineering expertise and hunting experience to developing ground blinds. Like treestands, our guiding design principles of Safety, Comfort, Silence and Concealment apply perfectly. So, we're proud to introduce two exciting new series of ground blinds for 2009:

THE RUN-N-GUN-

Which completely reinvents the tent-style hunting blind.

THE AMBUSH SERIES OF LAYOUT BLINDS – Representing a breakthrough in comfort, concealment and convenience in the field.

GROUND BLINDS

STAND YOUR GROUND

RUN-N-GUN MODEL 87001 DELUXE

Our new Run-N-Gun Deluxe ground blind sets up in an incredible ten seconds - and takes down in five. It's quiet and roomy (6' x 6' / 69" tall at center) and offers all of the advanced hunting features demanded by hard-core hunters, including large, removable "shoot through" mesh windows, silent side adjustable window flaps, a vented roof, brush loops and tie down straps. The cover is weatherproof, water-resistant, UV-protected pongee material in FLX digital camo on the outside and matte black on the inside.

A BETTER MOUSETRAP INDEED.

Leave it to our engineers to completely reinvent the ground blind. When our customers asked us to design and build a better ground blind, the common complaint they shared with the blinds they were currently using was they were all too complicated and timeconsuming to put up and take down. So, we designed a blind that will go up in ten seconds - and take down in five. No kidding.

The secret is the Run-N-Gun's unique inverted high-tension framework that works sort of like an inside-out, upside-down umbrella - only you use your feet instead of your fingers. Sure it's a little different - actually, it's a LOT different - and everyone who tested it in the field thought it was very cool.

RUN-N-GUN STANDARD

MODEL 87002

The Run-N-Gun Standard offers all the performance features of the Deluxe model, but with 600 Denier material. The exclusive inverted high-tension framework sets up in ten seconds and takes down in five. Like the deluxe model, the blind interior is a roomy 6' x 6' footprint with a 69" ceiling at the center. Removable, large "shoot through" mesh windows adjust silently.

FLX and NEXT G1. The Run-N-Gun blinds feature two of the newest, most innovative camouflage patterns on the market today. FLX is a revolutionary new digital pattern that excels at concealing large objects at both long and short distances. NEXT's G1 is a classic woodland pattern featuring sticks, leaves and other natural elements so it blends into to most hunting environments.

RUN-N-GUN

MODEL 87003

The Run-N-Gun Lite is designed for hunters on the go. Built with the same inverted high-tension framework that sets up in ten seconds and takes down in five, the Lite model features a more compact 5' x 5' footprint, 65" ceiling and a lighter-weight 300 Denier material.

The large 48 x 15" window features "shoot through" mesh and the side window flaps adjust silently. Comes in NEXT G1 camo on the outside and matte black backing on the inside.

> GROUND BLINDS

AMBUSH MODEL 87004 DELUXE

Our new Ambush Deluxe blind offers field hunters all of the advanced features and comfort they want in a premium layout blind - yet it folds up lengthwise to fit in the back of an SUV. The heavy-duty aluminum frame features a unique folding design for easy set up/take down. The 600 Denier polyester shell features the new FLX-OT (Open Terrain) Digital Camo shell. A rugged PVC Bottom is waterproof in up to 4" of water. The roomy, flip-top cockpit features a zippered front for easy clean up. Over 100 stubble straps make brushing out the blind fast and easy.

The heavy-duty aluminum frame features a unique folding design for easy set up/ take down. No pins or bolts to freeze up or lose in the mud and snow. The blind folds in half lengthwise for easy transport in the back of an SUV - no pickup or trailer required.

AMBUSH

MODEL 87005

The Standard Ambush™ features the same heavy-duty aluminum frame with the same unique folding design for easy set up/take down. The FLEX™ OT (Open Terrain) Digital Camo shell is 600 Denier polyester with a durable 1200 Denier polyester floor. With a roomy, flip-top cockpit, zippered front for easy clean up, over 100 stubble straps and handy zippered flagging ports on both sides, the Ambush Standard is the best value in high-performance layout blinds on the market today.

Both the Deluxe and Standard versions feature concealed flagging ports so you can flag distant flocks without opening the door of the blind.

Comfort, concealment and visibility is what it's all about in those gray hours of dawn when the geese start to fly. Our wide-screen mesh window provides a clear view of the sky, but conceals your movements from the eyes above. A fully adjustable lumbar, back, neck- and headrest is so comfortable, it just might lull you to sleep.

The low profile of the Ambush blind makes it completely concealed in the field. Over a hundred stubble straps make brushing out the blind fast and easy.

AMBUSH

MODEL 87006

Our Economy model features a rugged heavy-duty aluminum frame with 600 Denier PVC-backed polyester fabric cover in an all-purpose khaki color. The low profile and stubble straps improve concealment. The roomy flip-top cockpit features a large, built-in gear and decoy bag with drawstring closure and an oversized mesh screen viewing window. The insulated padded seat is constructed of closed cell foam.

Even our economy model pays attention to comfort features, with thick padding and an ergonomic headrest. It also features the same low profile which is vital to proper concealment in harvested fields where ground cover is sparse or non-existent.

Our all-purpose, PVC-backed polyester khaki material was carefully selected for rugged durability, an economical price and an easily concealed neutral color. With over 100 stubble straps and a little brushing out, you'll not simply blend in – you'll virtually disappear.
