### **IMPORTANT!**

**Customer to supply wraps trimmed to Vulcan's template size. For trim sizes contact your Sales Rep.**

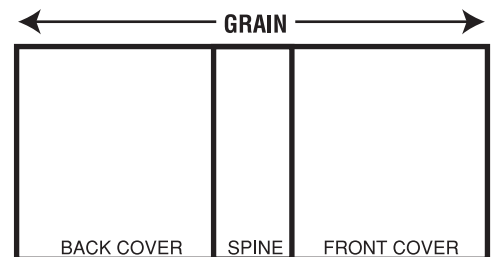

**Questions?  
1-800-633-4526**

**NOTE:** If order amount is in-between quantity categories, go to next higher category. Example: 350 pc. order - add 88 pieces.

- **Paper:** 80# minimum, 100# preferred - C1S Label
- **Gloss Lamination:** .5 mil gluable/stampable polyester (1.2 mil with adhesive)
- **Matte Lamination:** .5 mil gluable/stampable polypropylene (1.2 mil with adhesive)
- **Miscellaneous:**

**Press sheets cannot have aqueous primer or coating prior to lamination. This will cause the lamination to detach from the binder leaving air bubbles.**

**Lamination to be applied to paper in a way that will cancel out the curling of the paper. Paper should be printed grain long (see diagram to right). Lamination must bleed past our cut lines to allow for excess trim on all four sides.**

**Sheets must arrive flat with no curling. Each stack must not exceed 30" tall. Sheets cannot cling together due to lamination, paper, static, etc. Sheets stacked over 30" create blocking/clinging due to weight factor. Each sheet is fed into automated equipment. Clinging causes multiple sheets to be inserted into the equipment causing those sheets to be spoiled.**
